Workshop on "Web Development" (for 2nd year)
09-01-2018

A Report on Web Development Workshop
Organized under GNITS-CSI Student Chapter

Date(s): 9th Jan'2018   **Audience:** 2nd B.Tech –CSE- A, B&C

Aim of the Workshop: To give the awareness on various technologies used in developing web applications and enabling the students to develop small web application as their mini project.

Topics Covered:

- Introduction to Web Development and Technologies
- Introduction to static and dynamic web projects
- Introduction to Dreamweaver IDE
- Introduction to Flash
- Introduction to web servers
- Introduction to web scripting Languages

Highlights of the workshop:

- The workshop mainly dealt with website designing.
- Basic HTML program was explained.
- Explanation of simple website using "Dreamweaver".
- Creating and importing Flash files into website.
- Importance of Dynamic web project.
- Finally sample web project was explained.

The workshop was conducted on two days i.e., on 9th Jan'2018 for 2nd CSE-A, B & C from 1:40 pm to 4:10 pm. By the winners of Web App Development contest.

The speakers have put more effort in delivering the content to the students in very less period of time. This workshop has given the students an idea about how to develop a web application both static and dynamic.

More than 90% of the students were attended the workshop and given an overall feedback as "Good" and they are very much interested to attend this kind of workshops in the future.
