ABSTRACT

As the name specifies “ GNITS HOSTEL MANAGEMENT SYSTEM” is a software developed for managing various activities in the hostel .For the past two years the number of educational institutions are increasing rapidly .Thereby number of hostels also increasing for the accommodation of the students studying in the institution .And hence there is lot of strain on the person who are running the hostel and softwares are not usually used in this context .

This particular project deals with the problems on managing a hostel and avoids the problems which occur when carried manually . Identification of drawbacks of existing system leads to designing of computerized system that will be compatible to the existing system with the system which is more use friendly and more GUI oriented.

SYSTEM REQUIREMENTS:

Software Requirements:

Platform	-Notepad
Front End	-Html and CSS
Development Tool	-Google Chrome
Back End	-Django

Hardware Requirements:

Name of the Processor	-intel i7
Hard Disk Capacity	-1 TB
RAM Capacity	-8 GB
