ABSTRACT

The history of the Snake game goes back to the 1970's. However, it was the 1980's when the game took on the look that we will be using. It was sold under numerous names and many platforms but probably gained widespread recognition when it was shipped as standard on Nokia mobile phones in the late 1990's.

The snake game is a very popular and fun game. Every time the snake eats the fruit, its length grows longer that makes the game more difficult.

The objective of this python project is to build a very famous slither aka snake game project. In this python project, the player has to move a snake by ninety degrees so it touches the fruit. If the snake touches itself or the border of the game then the game will over.

SYSTEM REQUIREMENTS:

Software Requirements:

Platform	- Windows 10
Front End	- HTML, CSS
Development Tool	- Visual Studio Code
Back End	- Java Script

Hardware Requirements:

Name of the Processor	- intel core i3
Hard Disk Capacity	- 199 GB
RAM Capacity	- 4.00 GB
