ABSTRACT

Hostel life is something that a student experiences at least once in his/her life time. And the best part comes when we collect our passes to go home for vacation. We stand in queue for a long time, and warden calls our parents to confirm if we are going home. In case of an emergency, it takes a long time, to get the pass. And there is a chance that sometimes a student might miss the pass or forget it somewhere.

To achieve a new mile to hostel life, we create a website that makes this process easier. With this website, students can get their passes approved. And there will be updates on the progress. This gives us information in a faster way, and avoids last minute rush. And using this, there is no chance that a student's pass could get missed.

SYSTEM REQUIREMENTS:

Software Requirements:

Platform	- Windows 10
Front End	- HTML, CSS, Java Script
Development Tool	- Visual Studio Code
Back end	- Django

Hardware Requirements:

Name of the Processor	- intel i5
Hard Disk Capacity	- 1000 GB
RAM Capacity	- 2 GB
