ABSTRACT

We often tend to search of different apps for playing games based on our age group, current mood, number of players available at that particular moment and many more factors. It is hectic and time taking process every time to search for different games. Hence it is common to prefer an app consisting of different games suitable for every individual at any moment.

Hence, our gaming app "GAMING WORLD" provides games for every frame of mind. It incorporated with games which are brain storming, fun, entertaining. It allows the user the choice to select any game also based on difficulty level. It consists of a special features where users can change the user interface according their respective moods. It consistently track the top 5 high scores of respective game.

The games module which we have included are lodo, sudoku, tic-tac-toe and puzzle picture etc., This app helps to engage and motivate players, increase thinking capability through direct experience.
