### DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project  
on "Personal Finance Management"

#### Abstract

In today's fast paced world, managing personal finances can be a daunting task, especially for engineering graduate students who are transitioning into workforce. This personal finance management website is designed to help recent engineering graduates manage their finances more effectively and achieve their financial goals. The aim of this project is to create a basic personal finance management website that allows users to track their income and expenses. The website will be built using HTML, CSS, and JavaScript, and will be hosted on a web server.

Users will be able to register for an account on the website, and will then be able to input their income and expenses manually. The website will store this data in a simple database, and will then calculate the user's total income and expenses. The website will also provide users with the ability to set budget goals and track their progress towards achieving them. This will help users to stay on top of their spending and avoid overspending. Overall, this project will provide a simple and easy-to-use platform for users to manage their finances effectively. The basic features of the website will allow users to quickly and easily input their financial data and view it in a way that is useful and easy to understand.

#### H/W & S/W Requirement

**H/W Requirements:** Intel Core i5 processor, 8GB Ram, 64-bit OS, 512GB HD.

**S/W Requirements:** Html, CSS, JavaScript, PHP, MySQL/Django database.
