<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project

on "MAID HIRING"

Abstract :

Maid On-Demand is a game-changing mobile web application that is revolutionizing the way we think about domestic cleaning services. Gone are the days of having to spend hours searching for and contacting multiple maids to find the right one for your needs. It has features such as Post job requests and accordingly they would be able to hire the home-service professional in their area. Upon posting requests for jobs, customers would receive customized quotes from various home-service professionals. Accordingly, they can check the business profiles, ratings, and reviews of home service professionals. Then they can pick professionals who very well meet their requirements & area of specifications, and can book an appointment with them. There are myriad benefits of a maid on-demand booking mobile web application for your business it opens your business to a wide number of customers by expanding your network and making the services offered by you available to a large group audience in an area, or a city. All this is done by just creating a profile where you specify the kind of services offered by you, along with the charges and the areas where the service will be provided. As soon as you are done, the web application will connect you with interested customers and home-service professionals.

Upon satisfying the customers with your services, you are certain to receive rave reviews from them which would further boost your business and increase visibility to potential clients. The web application also allows posting the home-service professionals' experiences with the customers, which can be pretty useful. Hence, it is clear that there are countless benefits of such an web application and all you need is to just start and enjoy the privileges coming with it.
