500104

### DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project on

## “React Movie App”

### Abstract:

The React movie app is a project that aims to provide a platform for movie enthusiasts to browse, search, and discover information about their favorite movies. The app is built using the React library and leverages various APIs and data sources to retrieve information about movies such as their titles, release dates, ratings and cast. The user interface of the app is designed to be intuitive and user-friendly, allowing users to easily navigate through different sections of the app, view movie details, and add movies to their favorites list. The React movie app is an exciting project that showcases the power of React and its ability to create engaging and interactive web applications.

### H/w & S/w Requirements:

- > Processor-i5 ,4GB, Internet Connection
- > Windows 11, Javascript,CSS from Bootstrap, OMDb API
