On
"RESUME BUILDER"

Abstract:

Resume Builder is a web application that will auto-generate a nice and properly formatted Resume from the information filled up in a form. In the job search process, a well-written and well-designed resume is essential but, creating a resume is a bit tedious task for any working professional from any industry. One has to keep it short, simple, and with the latest work experience, and constantly update it over a while. This project will help through the process that can be followed to build resume-builder using ReactJS and NodeJS. Implementing the project will give the satisfaction of auto-generating it and helps working professionals with the same. It displays professional resume structures in a user-friendly format, so that it enables to choose which sections of the resume to be published. After the submission of details, it downloads our resume in neat and specified format.

H/W & S/W Requirements:

- Processor i5, Memory – 8GB RAM
- Visual Studio code, HTML, CSS, Bootstrap, Java Script, Django
