Hyderabad-500104

**DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING**  
<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project on  
"SPOLIGHT YOUR MENU"

**Abstract:**

Customer satisfaction is the key to success for any business. This restaurant website helps the restaurant management to easily serve the customers as well as creates a peaceful environment to the customer. In many restaurants, waiters/waitresses tend to miss out on tables or customers calls during busy hours potentially decreasing ones clientele, these type of problems can be overcome by this project. This website includes different sections like Home Page which displays the details of the restaurant, Category displays the type of food preferred. The customer is requested to place their order from the application by adding their items to the cart along with the table referral code. The management receives an immediate notification about the order placed by the customer including the table number. The customer is provided by an additional space for their queries and feedback. The main reason for creating this website is to make customers get satisfied with the restaurant's fast and efficient services without any contact.

**H/W & S/W Requirements:**

- Processor- i5, Memory -15GB, Hard Disk - 5GB
- Windows 11, HTML, CSS, Javascript, VisualStudioCode
