DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project

on "Sneak Out"

Abstract:

Game Development is the art of creating games and describes the design, development and release of a game. It may involve concept generation, design, build, test and release. While creating a game, it is important to think about the game mechanics, rewards, player engagement and level design. The main aim of this project is to develop a game by adding new technologies and enhanced graphics. "Sneak out" is a two player game where each player controls a rocket and has to get to the top of map having avoided the space debris in order to save his points. This additional feature makes the game more interesting by increasing the competitive spirit among the players.

H/W & S/W Requirements

- Processor-i5,32 GB RAM,500SSD
- Visual Studio code,Adobe Photoshop
