### "BOOKWISE"

#### Abstract:

Bookwise is an app designed to provide book reviews and recommendations to avid readers. Reading is a wonderful way to relax and escape into new worlds and this app aims to help users discover new books to delve into. Users can search for books based on various parameters, such as genre, author, and rating. The app provides a detailed synopsis, review, and rating for each book to help users decide which books they may be interested in reading. The app also allows users to browse through lists of popular books, curated collections, and readlists. Users can login to the app to keep track of their reading history and to create their own reading lists. Users can also submit their feedback and complaints through a separate complaints page, which allows for better communication and transparency within the reading community. Overall, Bookwise aims to enhance the reading experience for users and help them discover new books they will love.

#### H/W and S/W Requirements:

- Processor-i7,8 GB RAM
- Code Editor, Node.js, React, ReactJS Library
