DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project
on "Medicine Remainder"

Abstract

A medicine reminder app is a mobile application that helps users manage their medication schedules. The app allows users to set reminders for taking medications, and keep track of their pill intake. The app also provides helpful information about medications, such as dosage instructions and side effects. The benefits of using a medicine reminder app include increased medication adherence, improved health outcomes, and reduced healthcare costs. Additionally, the app can provide peace of mind for users and their loved ones, knowing that medications are being taken on time and as prescribed. The main features of the app include medication schedule, medication information, availability of icons, medication interaction warnings, reminders regarding food intake.

H/W & S/W Requirements

Intel core i5 processor, Windows 10 or 11

Programming languages such as JavaScript, Swift. Frame works such as flutter, APIs: The app could use APIs to integrate with other healthcare systems or applications.
