<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project

On "Companion"

Abstract:

Mental Health is important issue in the world today .With the large population now working from home and staying from loved ones, the mental health situation has deteriorated. As such, it becomes important to track and remedy any problems before they get too serious.

Therefore our application is a health tracker which keeps track of user emotions and mental state and helps them to improve their mental health condition.

We ask some questions to the user and based on their answers, our application finds out the users suffering and suggests some kind of measures, tasks etc., and maintain a record of their mental state for displaying on a dashboard.

This is user friendly application .It is easy to use for all the users and design of page is also easy to see(i.e it does not make user to confuse).
