### DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING <GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project on "Online canteen food ordering Application"

#### Abstract

The existing method of ordering food involves standing in a queue in order to purchase token for the food we wish to have. It is a tiring and a time-consuming process. "Campus Bites" is an online canteen food ordering application which is a very effective solution for this issue and also helps in making the whole ordering, take away and payment process very systematic and smooth. The app will provide a simple and user-friendly interface, allowing students as well as staff to browse through the available food options and place their orders with ease. The quantity of food available is updated by an in-charge in the canteen using the admin application. The admin can add a new food item, update the quantity of available food item or remove a food item when it gets over. This will avoid users from ordering items that are already finished. The main objective of this project is to provide a seamless and hassle-free experience for students who want to order food from the canteen, ultimately improving the overall campus experience.

#### H/W & S/W Requirements

- Flutter, Dart, Firebase Firestore, Razor Pay, Visual Studio Code, Git.
- Windows 11, 1 TB – Hard Disk, i5 processor.
