**II SEM HOBBY PROJECT**

**on “Building a Web 3.0 Blockchain WebApp”**

**Abstract:**

This abstract outlines the process of building and deploying a modern Web 3.0 blockchain application. The application will be built using the latest blockchain technologies and will be designed to provide a decentralized, secure, and transparent platform for users. The development process will involve creating smart contracts, building a user interface, and integrating with various blockchain networks. The deployment process will involve selecting a suitable blockchain network, deploying the application, and ensuring that it is secure and scalable. The resulting application will provide users with a seamless and secure experience, while also enabling them to interact with the blockchain in a decentralized and transparent manner.

**H/W & S/W Requirements :**

Solidity, Smart Contracts, Crypto,HTML ,CSS,monitor

Dept R&D: Yes / No

\* If No : GNITS
