Shaikpet, Hyderabad-500104

### DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

<GN-R-18> (2021-2025) II B. Tech II Sem  
Hobby Project on "Web Development"

#### Abstract

The world is full of creative minds with innovative ideas, but not everyone has the resources or connections to turn their ideas into reality. Our idea of 'Idea Marketplace' is to build a website that aims at bridging this gap and connecting idea proposers with companies around the world. This website allows users to tag companies and propose real-time ideas for them to use. The website is designed to be user-friendly and easy to navigate. Users can simply create an account and start tagging companies with their ideas. They can quote an amount to buy/patent the idea, and if the company likes it, they can purchase it directly from the website. The website also provides a pre-formatted patent agreement to make the process hassle-free. For companies, this website offers a unique opportunity to tap into the creativity of people around the world while for idea proposers, this website offers a chance to monetize their creativity and get recognition for their ideas.

In conclusion, this website offers a unique and innovative way of connecting idea proposers with companies around the world. It streamlines the process of buying and selling ideas, making it easier for both parties to benefit from each other's creativity. Companies can access a vast pool of ideas and select the ones that best fit their needs, while idea proposers can monetize their creativity and gain recognition for their ideas. Overall, this website has the potential to revolutionize the way ideas are bought and sold, and could open up new opportunities for both individuals and companies alike.

Dept: GNITS

#### Data and S/W Requirements:

Front end: HTML, CSS, JavaScript. Back end: Python, application of the MVC Data Storage: DBMS like MySQL with payment gateways like PayPal, Strike, Razor Pay etc. Host on cloud-based platforms like: AWS, Google cloud or Microsoft Azure
