Shaikpet, Hyderabad-500104

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING
<GN-R-18> (2022 - 2023) II B-Tech II Sem Hobby Project
on "ARTCART"

Abstract

The paper discusses about the mobile application on online ART exhibition. This mobile application is developed to connect the artists and the public. Using this mobile application, the buyers can find their desired art collection from different categories of arts (paintings, handicrafts, vintage collections). There will be two different categories. One for the artists to enroll themselves to exhibit and sell their work and the other for the public to find their desired collection. Art has a fascinating history. This platform is of great use for all the artists as it helps them to exhibit their art and attract the buyers. Here you can discover a world of creativity at our **art** and craft store. Shop for premium quality supplies, tools, and materials for your home decor, gifting, personal etc. ArtCart is a decent art history app. It has a variety of artworks from various classic artists. The app tells you the story of each painting or work of art through storytelling with a neat little chat bot.

H/W & S/W Requirements:

H/W : Intel core i5 processor, 16 GB Memory, 512 GB SSD.

S/W : HTML, CSS ,Java Script.

*Dept R&D: No   * If No : GNITS
