<GN-R-18> (2022 - 2023) II B.Tech II Sem Hobby Project

On

“VIRTUAL COUNSELLING”

Abstract:

Student's Counselling is the process that includes different types of activities such as guiding students of a college, supporting them in academics, providing full guidance in getting the information related to their future career. Almost all existing counselling is done manually where there is a huge involvement of traditional methods like humans and paperwork which consumes more time, complicated process, counselling more students is a complex task, difficulties in test evaluations, risks in data management and many more.

This online student counselling system even gives great support to universities and colleges through which they can totally reduce the paper usage for counselling and guiding the students towards their future. This project is chosen to save time and resources of counselors as well as students and to overcome the existing drawbacks in maintaining records. This project can be used by the counselors and students who can update specific assigned usability data regularly. The feasibility and maintenance of the project help to make it more profound and easy to use.

Hardware Requirement

1. Intel core i5
2. Memory -8GB
3. System type- 64bit OS

Software Requirements

1. Java, SQL, C, HTML, CSS
2. Platform-Windows 10

*Dept R&D: No

* If No: GNITS
