

**G.NARAYANAMMA INSTITUTE OF TECHNOLOGY & SCIENCE (For Women)**  
**(AUTONOMOUS)**  
**Shaikpet, Hyderabad – 500104**

**Placement Training summary**  
**(Academic year-2021-22)**

During the academic year 2021-22, Bytexl India Pvt Ltd actively participated in a Campus Recruitment Training program, benefiting 179 second-year students from various branches of engineering. The primary objective of this initiative remained constant: to equip these students with essential skills crucial for success in job assessments and interviews held right on the college campus. To achieve this goal, the program placed special emphasis on preparing these soon-to-graduate students for employment opportunities, with a focus on C programming and Data Structures. The program's structure was thoughtfully devised, featuring a carefully planned curriculum that comprehensively covered all the necessary aspects required for students' upcoming job interviews. Proficient mentors provided expert guidance throughout the program, ensuring that students received consistent support at every stage of their learning journey. Additionally, the program incorporated regular assessments and tests as valuable tools to gauge student progress and pinpoint areas where additional assistance was required. The outcomes achieved through this admirable initiative were nothing short of exceptional. Students not only demonstrated improved technical competence in C programming and Data Structures but also cultivated newfound self-confidence. This boost in self-assurance played a pivotal role in their success during job interviews, resulting in a substantial number of securing positions in esteemed companies. This program underscored the importance of not only acquiring technical skills but also nurturing self-confidence, an essential element as students embark on their professional journeys. Bytexl's unwavering commitment to enhancing both coding abilities and self-confidence had a profoundly positive impact on these students, effectively bridging the gap between their academic education and the real-world job requirements they encountered.
