Shaikpet, Hyderabad – 500104**

**Placement Training summary
(Academic year-2019-20)**

In the academic year 2019-20, Conduira Education & Training Service Pvt. Ltd. participated in a Campus Recruitment Training program for 560 engineering students from various engineering branches. The primary aim of this program was to assist these students in getting ready for job evaluations and interviews held at their college campuses. To achieve this, the program concentrated on teaching them coding skills in C programming and Data Science (C&DS), and later, Java coding. The program was meticulously crafted, with a well-thought-out plan covering all the essential aspects students needed for their upcoming job assessments and interviews. Skilled trainers provided guidance throughout the program, ensuring students received expert support every step of the way. Regular assessments and tests were also a part of the program to measure the student's progress and pinpoint areas where they needed extra help. The outcomes of this program were quite impressive. Students not only improved their technical abilities in areas like C&DS and Java coding but also gained increased self-assurance. This newfound confidence played a crucial role in their success during job interviews, leading to many securing positions in well-respected companies. This program highlighted that it is not only about acquiring technical skills; it is also about building self-confidence, which is vital as students embark on their careers. Conduira's commitment to enhancing both coding skills and self-confidence had a substantial positive impact on these students, helping them bridge the gap between their academic education and the real-world job demands they encountered.
