

**G.NARAYANAMMA INSTITUTE OF TECHNOLOGY & SCIENCE (For Women)**  
**(AUTONOMOUS)**  
**Shaikpet, Hyderabad – 500104**

**Placement Training summary**  
**(Academic year-2019-20)**

In the academic year 2019-20, Edyst Consulting Pvt Ltd. took part in a Campus Recruitment Training program for 300 engineering students from various engineering streams. The primary goal of this initiative was to assist these students in getting ready for job evaluations and interviews conducted right at their college campus. To achieve this, the program focused on teaching them coding skills, especially through an Advanced Algorithms and Data Structures Training Program. The program was thoughtfully designed, featuring a well-structured curriculum that covered all the essential aspects necessary for the student's future job interviews. Competent trainers provided guidance throughout the program, ensuring students received expert support at every stage. Regular assessments and tests were also integrated into the program to measure student progress and pinpoint areas where additional help was needed. The results achieved through this program were quite remarkable. Students not only improved their technical capabilities in advanced algorithms and data structures but also developed newfound self-confidence. This increased self-assurance played a crucial role in their success during job interviews, leading to many securing positions in esteemed companies. This program underscored the significance of not only acquiring technical skills but also building self-confidence, a vital element as students embark on their professional journeys. Edyst Consulting's dedication to enhancing both coding skills and self-assurance had a notably positive impact on these students, effectively bridging the gap between their academic education and the real-world job requirements they encountered.
