**Placement Training summary
(Academic year-2021-22)**

During the academic year 2021-22, Edyst Consulting Pvt Ltd. actively engaged in a Campus Recruitment Training initiative, benefiting 225 students pursuing third year engineering degrees across various academic disciplines. The primary objective remained consistent: to equip these students with the essential skills needed to excel in job assessments and interviews, all conveniently taking place within their college campus. The cornerstone of this endeavor was a strong emphasis on instilling coding proficiency, with a specific focus on Advanced Algorithms and Data Structures Training Program. The meticulous design of the program featured a systematically structured curriculum, comprehensively addressing all vital aspects essential for students' future job interviews. Throughout this journey, experienced trainers provided unwavering guidance, ensuring that students received expert assistance at every juncture. To assess and fine-tune student progress, regular assessments and tests were seamlessly woven into the program, helping pinpoint areas where additional support was required. The results achieved through this commendable initiative were nothing short of remarkable. Students not only demonstrated enhanced technical prowess in advanced algorithms and data structures but also nurtured newfound self-confidence. This surge in self-assurance played a pivotal role in their success during job interviews, leading to a substantial number of securing positions in highly-regarded companies. This program underscored the significance of not just acquiring technical skills but also fostering self-confidence, an indispensable element as students embark on their professional journeys. Edyst Consulting's steadfast dedication to elevating both coding abilities and self-assurance had a profoundly positive impact on these students, effectively bridging the gap between their academic education and the real-world job requirements they encountered.
