Placement Training summary
(Academic year-2022-23)

In the academic year 2022-23, Edyst Consulting Pvt Ltd. actively participated in a Campus Recruitment Training initiative, benefiting 220 third-year engineering students hailing from diverse engineering branches. The core objective of this training remained unwavering: to prepare these students for job evaluations and interviews held right on their college campus. In pursuit of this objective, the program placed particular emphasis on equipping them with coding skills, with a dedicated focus on an Advanced Algorithms and Data Structures Training Program. The program's structure was thoughtfully devised, featuring a carefully planned curriculum that comprehensively addressed all the requisite facets necessary for students' forthcoming job interviews. Competent mentors provided guidance throughout the program, ensuring that students received expert support consistently at every stage of their educational journey. Additionally, the program incorporated regular assessments and tests as valuable tools to gauge student progress accurately and identify areas necessitating additional support. The outcomes achieved through this commendable initiative were truly remarkable. Students not only exhibited improved technical prowess in advanced algorithms and data structures but also cultivated newfound self-confidence. This surge in self-assurance played a pivotal role in their success during job interviews, resulting in a significant number securing coveted positions in esteemed companies. This program underscored the profound importance of not solely acquiring technical skills but also nurturing self-confidence, an indispensable element as students embark on their professional ventures. Edyst Consults' unwavering commitment to elevating both coding abilities and self-assurance had a profound and lasting impact on these students, effectively bridging the gap between their academic education and the real-world job prerequisites they encountered.
