**(AUTONOMOUS)**  
**Shaikpet, Hyderabad – 500104**

**Placement Training summary**  
**(Academic year-2018-19)**

During the academic year 2018-19, Edyst Consulting Pvt Ltd. engaged in a Campus Recruitment Training program for 220 engineering students from various engineering streams. The primary aim of this program was to assist these students in preparing for job assessments and interviews held at their college campus. To achieve this, the program emphasized training them in coding skills, particularly in an Advanced Algorithms and Data Structures Training Program. The program was meticulously planned, providing a well-structured curriculum that covered all the necessary aspects for students' future job interviews. Knowledgeable trainers offered guidance throughout the program, ensuring students received expert support every step of the way. Regular assessments and tests were also a part of the program to gauge the student's progress and identify areas where they needed additional assistance. The results achieved through this program were quite impressive. Students not only improved their technical abilities in advanced algorithms and data structures but also developed a newfound confidence in themselves. This increased self-assurance played a pivotal role in their success during job interviews, leading to many securing positions in respected companies. This program highlighted the importance of not only acquiring technical skills but also building self-confidence, a vital aspect as students embark on their careers. Edyst Consulting's commitment to enhancing both coding skills and self-assurance had a significant positive impact on these students, bridging the gap between their academic education and real-world job demands.
