Summary

I like to be innovative and do special things which brings smile to other people's face. I always believe in a phrase " Don't work hard just work with heart."

Now I am working on what I love ,which will be a new phase which changes the education platform and build a new technical arena for passionate learners.

Educational technology is the study and ethical practice of facilitating learning and improving performance by creating using and managing appropriate technological resources. Technology has the power to transform education

Thus joined Codegnan to make students and every passionate learner realize what they are and pursue their passion and make their dreams come true. We strongly believe "Nothing is Impossible with persistent practice and effort".

Action Taken on FDP “Machine Learning with Web Development “

Held from 06-07-2020 to 10-07-2020

Actions Taken:After conducting an in-depth analysis of the feedback received for our Faculty Development Program (FDP), we found that the assignments and overall rating were slightly below our expectations. To address this concern and ensure a more enriching learning experience for our participants, we have decided to take decisive actions. Moving forward, we will be transitioning the FDP to an offline mode. This change aims to foster better engagement and interaction among participants, providing them with a more conducive environment for learning and collaboration. Additionally, we will be incorporating valuable insights from the feedback into the course content and structure, tailoring it to meet the specific needs and preferences of our participants. By implementing these actions, we are confident that the FDP will witness significant improvements, enabling us to better support the professional growth and development of our faculty members. We are excited about this positive change and look forward to the enhanced outcomes it will bring.
