REPORT

FDP on “Artificial intelligence and machine learning Real time applications”

Date of program: 20-9-2021 to 30-9-2021

Resource person: Dr J.Ravi kumar

I P.Sreesudha attended Artificial intelligence and machine learning Real time applications .The following topics are covered and I gained the knowledge on the following Applications of AI&ML. Artificial Intelligence (AI) and Machine Learning (ML) find application across various industries and domains in real-time scenarios. Here are some examples:
Healthcare: AI and ML assist in real-time disease detection through medical imaging analysis (like MRI, CT scans), personalized medicine, drug discovery, and patient monitoring systems.
Finance: Fraud detection in real-time transactions, algorithmic trading, risk assessment, and personalized financial recommendations are some areas where AI and ML are applied.
Smart Homes and IoT: AI-powered devices in smart homes use real-time data to automate tasks like adjusting temperature, managing energy usage, and enhancing security. I also learned about Autonomous Vehicles, Customer Service, Manufacturing and Industry, Cybersecurity, Natural Disaster Prediction, gaming etc. All these are useful for project work.
