Frontiers of Data Science in Trending Technologies

Frontiers of Data Science in Trending Technologies

📅 05 May 2022 - 13 May 2022 | 🧑‍🎓 Organized by: Departments of M&H & CSE MGIT 🌐 Website

📄 | 📄 Registration Form (https://forms.gle/HjG1bGQ3yXhokSs8A) | 📄 Brochure (/wp-content/uploads/2022/06/Frontiers-of-Data-Science-in-Trending-Technologies.pdf)

Data science is an interdisciplinary field that uses scientific methods, processes, algorithms and systems to extract knowledge and insights from noisy, structured and unstructured data and apply knowledge and actionable insights from data across a broad range of application domains. Data science plays a major role in Digital technology domains of Data mining, AI and Machine learning. Data science is a concept to unify statistics, data analysis, informatics, and their related methods in order to understand and analyze actual phenomena with data. It uses techniques and theories drawn from many fields within the context of mathematics, statistics, computer science, information science, and domain knowledge.

Venue:

- Location MGIT, Hyderabad

FDP Guidelines:

REPORT

FDP on “Frontiers of Data Science in Trending Technologies”

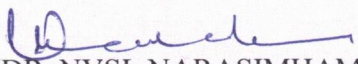

Date of program: 09.05.2022 to 13.05.2022

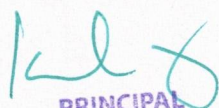

Resource person: Dr. Rama Challappa, University of Mariland, USA, Dr. Abhilash, UK, Dr. Arun Tangirala, IIT-C.

About the Program: The Program mainly focused on the following themes.

- ❖ Introduction to Data Science
- ❖ Variants of Data Science
- ❖ Data Science in different fields
- ❖ Data Science in Trending Technologies

Data Science is an inter disciplinary field that uses scientific methods processes, algorithms and systems to extract knowledge. The program mainly focused on Data Science in many fields with in the context of Mathematics, Statistics, Computer Science, Information Science and Domain Knowledge.
