**About the course:**

The Faculty Development Program on IPR provided participants with a holistic understanding of intellectual property, from the basic concepts to practical application. The sessions on patent filing, patent search, patent drafting, and copyrights equipped educators with the knowledge and skills necessary to integrate IPR concepts into their teaching curriculum. The FDP not only enhanced the participants' understanding of IPR but also empowered them to disseminate this knowledge effectively in their academic roles. The interactive nature of the program, including practical exercises and case studies, contributed to a rich learning experience for all participants.
