COFFEE TABLE BOOK

GNITS Alumnae Meet
Bengaluru Chapter

Tu Turno - Bengaluru

If a job is worth doing, it is worth doing it well.

We aim to transform GNITS into an exceptional technological institution at the forefront of scientific advancements, providing training that is aligned with current trends and future vision. The expertise of all the stakeholders is contributing immensely in the overall development of the institution. My words of appreciation go to the alumnae across the globe who are making GNITS proud. I congratulate the Alumnae Association on starting the new Bangalore Chapter.

Sri G. Raghava Reddy
Hon'ble Chair Person

Warm greetings to the readers of this Coffee Table Book of GNITS Alumnae. As alumna, nurtured at GNITS, I feel proud at the accomplishments of my fellow alumnae, spread across the world, leading empowered lives. It gives me immense joy to reach out to the GNITS alumnae in Bangalore through the new Chapter. I urge the alumnae to keep us informed of their achievements and milestones, to highlight in the newsletters and the coffee table books, as a source of inspiration to the current batches of students on the campus. Let us keep this valued association strong and steadfast.

Mrs G. Srividya Reddy
Hon'ble Vice-Chair Person

As we embark on this inaugural chapter meet, I am honoured to extend a warm welcome to each of you. This gathering marks the genesis of a new chapter in our institution's history—a chapter enriched by your experiences, achievements, and dedication. The establishment of this alumnae chapter symbolizes the enduring bond between our esteemed graduates and our alma mater. Your continued involvement underscores the values that unite us—a commitment to excellence, lifelong learning, and the spirit of community.

As we convene, let us celebrate not just our shared past, but the potential for collaboration, mentorship, and collective growth in the future. Your contributions to your respective fields and communities resonate with the ethos of our institution. This gathering is an opportunity to harness the collective power of our alumnae network, fostering connections that will inspire and empower future generations. I encourage you to seize this moment to reconnect, reminisce, and forge new alliances. Together, let us chart a course that strengthens our ties, enriches our alma mater, and paves the way for a legacy of distinction.

Dr K. Ramesh Reddy
Principal

Tu Turno - Bengaluru

Dr. B. Venkateshulu
Dean Alumnae Relations &
Higher Education

We are excited to announce the exciting launch of our new Bengaluru Alumnae Chapter.

Till now, we've seen our community grow stronger and more vibrant. The bonds we've forged and the stories we've created are the heartbeat of our shared history. Now, as we step into this new chapter, we have the opportunity to continue the legacy of our alma mater and create even more meaningful connections. The expectation of our new Bengaluru chapter is Networking opportunities - Connect with fellow alumnae who share your passions and professional interests. Our chapter will provide a platform for networking, mentorship, and collaboration. Community Impact - Together, we can use our collective strength to bring about positive change. If you're passionate about contributing your skills or ideas, we welcome your involvement in shaping the success of our chapter. Help us reach every member of our alumnae community by spreading the word and encouraging your fellow alumnae to join the chapter. Thank you for being an essential part of our alumnae community, and here's to many more years of connection, growth, and celebration!

Dear Friends, Warm Greetings to all the fellow Alumnae of GNITS!!

I am glad about the launch of the new alumnae chapter and sending all my best wishes for the new alumnae chapter's successful start! let us Join together in forging new connections, and motivating future generations and inspire one another to reach even greater heights.

I am delighted to note that along with my coordinators we made our best efforts to strengthen the association with a good amount of work placed on record. This year Rs. 1,44,000 is given as scholarship to the meritorious needy students, the platform for the alumnae to interact with their faculty has been provided, the networking and association among the staff and the juniors is widened. As the secretary of our alumnae association, I'm entrusted with preserving our legacy. Each day, I intertwine the past and present, fostering connections that define our alma mater's spirit.

We are glad to put forth the 6th edition of GNITS Alumnae Meet Bengaluru Chapter, TU TURNO - 2023 Coffee Table Book reflecting the success stories of Bengaluru Alumnae. I take this platform to thank each and everyone who have been my constant support in helping our Alumnae at every stage- the Management, Principal, HODs, Faculty and the staff.

Dr. P. Sreesudha
Secretary, Alumnae Association
GNITS

GNITS Bangalore Alumnae Chapter Executive Committee Members

Sumedha Maramraju - General Secretary

Sumedha Maramraju belongs to the 2008-12 batch of B.Tech. in Information technology. She joined JP Morgan through campus placement. After a 5 year stint in New York, Sumedha is currently working as the Strategy & Business Services Program Manager, JP Morgan.

Gokavaram Pranitha - Joint Secretary

Gokavaram Pranitha, passed out of B.Tech. in ETM in 2019. Currently she is working as Senior Software Engineer in Accenture.

Danta Pravalika - Executive Member

Danta Pravalika belongs to the 2023 batch of B.Tech. in CSE. Currently she is working as Associate Software Engineer in Informatica.

Tu Turno - Bengaluru

Kiranmayee Gangalam - Executive Member

Kiranmayee Gangalam, belongs to the 2023 passed out batch of B. Tech. in Computer Science and Engineering. She secured an internship in ABInBev, the world's largest Beer Company, through a hackathon and succeeded in converting it to a placement offer. Currently she is working as Senior Data Analyst at ABInBev.

Sharanya Chakravarthula - Executive Member

Sharanya Chakravarthula belongs to the 2023 batch of B.Tech. in ECE. Currently she is working as Senior Analyst in Ernst and Young India (EY).

N. L. Chaitra - Executive Member

N. L. Chaitra belongs to the 2019-23 batch of B. Tech. from the ECE branch. Currently she is working as Senior Analyst in Ernst and Young India.

Rajarajeshwari Chanda - Executive Member

Rajarajeshwari Chanda is from the 2017-21 batch of B.Tech. in EEE. Presently she is working in L&T technology services as Validation Engineer.

Messages

Tu Turno - Bengaluru

Dr. K.Ramalinga Reddy, Dean Academics

Dear Esteemed Alumni of GNITS,
Warm greetings to all the incredible women who once walked these halls! Your journey exemplifies the spirit of women empowerment, showcasing remarkable growth in diverse technical fields. Your achievements inspire current students to reach new heights, solidifying our commitment to fostering excellence. Here's to the trailblazers who continue to redefine the landscape of engineering. I would like to congratulate you on starting the new Bangalore Alumnae chapter.

Dr. M.Seetha, Dean - R&D

GNITS' Research and Development cell actively fosters a culture of research and innovation among faculty and students, aligning efforts with NEP 2020 to strengthen the research ecosystem. Collaborations with government and non-government institutions result in numerous MoUs, interdisciplinary research, resource sharing, and innovative problem-solving. JNTUH has sanctioned three research centers at GNITS, and our faculty, recognized as Ph.D. supervisors by universities like JNTUH, OU, KLEF, and VIT, contribute significantly to high-impact publications.

The institution has garnered several research projects from AICTE, DST, and others, with 41 patents published and 8 granted. MiraiNxt, launched in 2021, supports startups and accelerates future developments. We invite dynamic participation from our alumnae, recognizing their pivotal role in transforming the research and innovation ecosystem into a robust startup and entrepreneurship community.

Dr. I. Ravi Prakash Reddy -

Dean Placements & Corporate Relations

Dear Women Engineers Alumnae,

As the Dean of Placements & Corporate Relations, I'm delighted to witness your impactful journeys post your graduation. Your achievements illuminate our institution's success. Let's collaborate to strengthen the bonds between academia and industry, ensuring continued excellence for aspiring engineers. Your expertise is invaluable, and we welcome your continued engagement. #EmpowerThroughEngineering #AlumniConnection

Tu Turno - Bengaluru

Dr. Aparna Palle, Dean - Student Affairs

I am delighted to continue our everlasting ties with you. As our Alumnae, you have always been our source of strength and guiding force in taking the right initiatives for the progressive growth and development of our students. I hope and wish that the Alumnae Association would be a wonderful platform for all our alumnae for knowledge sharing and helping in creating a healthy bond between our institute and industries through valuable thoughts and suggestions shared on the latest technology advancements and the industry expectations. I am sure; this reunion would also take you down the memory lane and help you cherish the sweetest moments you had spent with your teachers, mentors and friends.

Dr.N.Malla Reddy, Dean Admissions & Hostel

Dear GNITS Alumnae,

I, Dr.N.Malla Reddy, Dean Admissions & Hostel, would extend my warm wishes to you all!

The Alumnae Meet, an annual tradition, is a testament to the profound and lasting impact that GNITS has had on the lives of countless individuals who have passed out through its gates. "One cannot help but be inspired by the incredible accomplishments of our alumnae," You are the torchbearers of GNITS rich tradition of producing leaders, innovators, and change makers in the field of engineering."

From groundbreaking research and entrepreneurial ventures to leadership roles in multinational companies, the alumnae of our college are celebrated for their multifaceted accomplishments. Your alma mater is immensely proud of your accomplishments, and we look forward to witnessing the continued success of our esteemed alumnae community. I extend my warmest congratulations on the momentous occasion of the inauguration of the new Bangalore chapter. Best wishes for a prosperous and impactful journey!

Dr. N. Kalyani, Dean - Innovation & Incubation

Dear GNITS Alumnae, It gives great joy to keep connected with our alumnae, you being the source of inspiration to the upcoming generations at GNITS. I congratulate you on achieving remarkable credibility in your work place and career path chosen, with the values learnt as a student.

Hearty congratulations on starting the new GNITS Alumnae Association Bangalore Chapter. This Alumnae Association helps in creating a healthy bond between our institute and industries by sharing your valuable thoughts on the latest technology advancements and the industry expectations. This reunion will undoubtedly bring back fond memories for you and enable you to cherish the special times you shared with friends, instructors, and mentors. I wish to take a moment to thank all the alumnae members who are involved in making the GNITSANS feel proud.

Wish you all the best for all your future endeavours.

Tu Turno - Bengaluru

Dr. G. P. Prasada Reddy, Controller of Examinations

Dear Esteemed Alumnae,

It brings me immense pleasure to extend a heartfelt welcome to the Bangalore alumnae chapter inaugural meet. The examination branch has been privileged to witness your growth and success, and today, seeing you return as esteemed alumnae fills us with pride.

This chapter meet marks not just a reunion, but an opportunity to celebrate your achievements and the values instilled during your academic tenure. Your experiences navigating the academic rigors have contributed to the refinement of our examination processes, and your successes continue to inspire current students. Your feedback will be instrumental in shaping the future direction of our academic evaluation processes.

Your network and connections play a pivotal role in fostering a collaborative environment that supports the growth and development of future graduates. May today be the genesis of a robust relationship between the examination branch and our cherished alumnae, one that fosters continuous improvement and mutual success.

Dr. A Sharada, HoD - CSE

Esteemed alumni, your achievements continue to illuminate the legacy of our institution. We proudly celebrate each one of you who are the trailblazers in leadership shaping the future. Embrace the legacy, empower the future: Alumni, your contribution to your Alma mater is warmly welcomed. The department of CSE, pioneering R&D since inception, built on the strength of well experienced and qualified faculty along with enthusiastic students, extends its warmest regards and best wishes to all of you!

Dr. P. RamaKrishna Reddy, HoD - EEE

I, Dr.P. RamaKrishna Reddy, Professor and HOD, would extend my warm regards to all the Alumnae! On behalf of the EEE department, I am always eagerly waiting to hear your success stories during your institute visit, where you can recollect all your beautiful memories

Congratulations to all the Electrified Alumni of the GNITIANS for your success in your career. Here's to the continued success of our outstanding alumnae!

I extend my congratulations for the momentous occasion of the inauguration of the new Bangalore chapter. We wish you all the best. Have the happiest life ahead.

Tu Turno - Bengaluru

Dr. K. Ragini, HoD - ECE

Dear Alumnae,

I hope this message finds you in good health and high spirits. As the Head of the ECE Department, it brings me enormous joy to reconnect with the outstanding women who have contributed to the legacy of our department.

I am delighted to note that the GNITS is starting a new alumnae chapter at Bangalore. I hope that the new chapter will strive for progress, Innovation and continue with excellence. As alumnae, you are the living testimony to the impact of our engineering education, and your continuous involvement is essential for department's growth.

I invite each one of you to actively participate in this chapter. Together, let us continue to empower and inspire the current generation of women in Engineering. Warm Regards.

Dr S. Ramacharan, HoD - Information Technology

I know that many of you have played an important part in supporting our college and something which has been even more meaningful over the past many years. The main goal of GNITS Alumni is to keep in contact with all the students who once studied here and help each other succeed in their professional fields. I hope you agree that you are proud of your GNITS college and will continue to support us in making the place, and the impact it has, even stronger in coming days.

Dr. Rajkumar Biradar, HoD - ETE

With great honour and pleasure, I greet you all on the auspicious occasion of our Institute's Tu Turno 23 Bengaluru chapter Alumni meet.

Your association with alma mater is not just a connection to the past; it is a celebration of progress and evolution. Together, let's build bridges that span generations and contribute to the enduring success of our alma mater.

It is indeed a matter of joy to reconnect with the esteemed members of our alumni community. Your achievements since leaving our campus have been a source of pride, and we are eager to strengthen our bond with you.

Hope you all will appreciate our efforts in the arrangements made for your reunion. Wish you all wonderful memories of the day. Have a good time ahead. Thank you!

Tu Turno - Bengaluru

Dr. M. Madhavalata, HoD - Humanities and Mathematics

Dear Alumni,

I extend my warmest greetings to you. Your achievements and contributions always continue to shape the success of the institution. I welcome you to get connected, share your experiences and memories, inspire the next generation. Your support is invaluable.

We from HM Department wish you all the best and a momentous occasion on inaugural of Bangalore chapter.

Dr. T. Charan Singh, HoD - Basic Sciences

The Department, of Basic Sciences conveys its Hearty Congratulations to GNITS Alumnae Association for starting the new Bangalore Chapter. We hope and wish that our Alumnae are going to play a significant role in meeting the objectives of the chapter in giving their time and expertise to the members of their alma mater and be a great support system in strengthening their bond and affinity towards their Institute. The sharings, initiatives and success stories of our alumnae shall be a great source of inspiration to our students on campus. Best wishes to the chapter and its members.

M. V. Ramana Reddy, HoD - Mechanical Engineering

Dear Esteemed Alumni,

I am filled with pride witnessing the incredible journeys each of you has embarked upon, after graduation. Your unwavering commitment to precision and creativity has seamlessly translated into successful careers, and it's heartening to see the impact you've made.

The initiation of the new alumni chapter in Bangalore not only marks a momentous occasion but also reflects the enduring bonds forged during our academic journey. I encourage you to draw inspiration from your experiences, remain curious, and continue pushing boundaries in this exciting new chapter. Your collective impact is a source of pride for our academic community, and I eagerly anticipate the continued success of each one of you.

Tu Turno - Bengaluru

T. V. Rammohan Reddy, HoD - Civil Engineering

Greetings from the Civil Engineering department of GNITS! Reconnecting with our accomplished alumni fills me with joy. Heartiest congratulations to those pioneering alumni who've established a new chapter in Bangalore. This chapter stands as a beacon for collaboration and camaraderie within the alumni network. Our institution has undergone significant infrastructural enhancements, including state-of-the-art facilities and modernized spaces. As we celebrate this milestone and share updates, your alma mater is keen to involve you in shaping the future. Your insights contribute to an enduring legacy. Looking forward to your continued involvement and the pleasure of hosting you on our upgraded campus. Best Wishes!

Dr. Narendra Babu Reddy G., Training & Placement Officer

Celebrate the journey of our esteemed alumni with a captivating coffee table book. Filled with vivid visuals and poignant narratives, this collection encapsulates the triumphs, resilience, and shared memories of our graduates. It's a celebration of academic milestones, enduring friendships, and the lasting impact our alumni make on the world. This collection serves as a timeless tribute to our alumni, embodying the essence of their transformative experiences.

Dr. M.V.L. Surya Kumari, Physical Directress

I am happy to note that GNITS Alumnae Association is spreading its wings beyaong Hyderabad. It is a wonderful opportunity to all the alumnae to join us and continue our journey together. The outstanding contributions made in sports and sports legacy set by our super star sports alumnae is commendable. We are struggling to maintain this legacy. Be in touch with us. Motivate and guide your juniors. Contribute your best and be a part of GNITS's growth and development. Wish you all the best.

Dr. K. Bharatha Lakshmi Devi, Librarian

Happy to note about the Alumnae Bangalore Chapter meet. Hope it's time to refresh all your campus memories meeting, sharing all your best moments to cherish. The GNITS Library is always at your service and shall look forward in receiving you as and when you visit the campus. Good luck in all your endeavours.

Success Stories

Busireddy Swetha

Ms. Busireddy Swetha was born on 30th July, 1994 in Kadapa, Andhra Pradesh. Her parents are Smt. B. Nageswari (House Wife) and Dr. B. Sudhakar Reddy (Professor of Physics, Govt. College for Men(A), Kadapa. She studied SSC and got 565 marks at Nagarjuna English Medium High School, Kadapa and got 979 marks in Intermediate at Narayana Junior College, Kadapa. She has secured State level 531 rank in EAMCET and got admission into G. Narayanamma Institute of Technology and Sciences (For Women) for BTech, ECE. On this basis of her merit rank, she was offered fee waiver at GNITS and the same is announced in the Orientation Programme by Shri.

Subbareddy Garu, Hon'ble Chairman of GNITS. She graduated in 2015 in ECE stream and got placement in Accenture, Infosys & Tech Mahindra, through college placements. Soon after completion of graduation, she joined in Accenture and worked there for 4 years. Later, with an aim of serving in Government of India, she has resigned her job at Accenture and did self-preparation for Staff Selection Commission (SSC-CGL) and also parallelly she appeared for IBPS PO recruitment exam and selected as Asst. Manager (Probationary Officer) at Indian Bank, Nizamabad. Upon selecting as a Group-B officer in Enforcement Directorate through SSC-CGL, she has resigned for the Asst. Manager Position at Indian Bank after 20 months of service.

Currently she is working in Group-B cadre at the Directorate of Enforcement, Bengaluru as Asst. Enforcement Officer for enforcing economic laws and fighting economic crime in the country. During her tenure at Directorate of Enforcement, she received appreciation for her work in the Department from her higher rank officials, by way of receiving certificates in recognition of her excellent performance, extraordinary efforts, commitment and exceptional contribution in accomplishment of entrusted responsibilities.

Tu Turno - Bengaluru

Kavitha Thumu

I Graduated from GNITS (EEE) in 2012.

After graduation, joined NIT Warangal to pursue masters in Power Electronics & Drives. After 1st year, I have been selected to be an exchange student at Politecnico di Milano university, Italy.

While studying there, I cleared an interview to be a research intern at Alstom Transport, a train manufacturing & signalling company. During 4 months of working at Alstom Italy, developed a concept called 'smart 2f filter' which got patented later.

After post-graduation joined the same company, Bangalore branch in 2014. Since then have been working in various roles as system Engineer, Traction Project Engineering manager, Traction skill leader... etc in designing Lucknow metro, Luxemburg EMU train and various other trains across the globe. Currently in the role of Traction EDU Manager (Expert), leading a team of 10 in the design of Traction converters.

GNITS has helped me to unleash my potential and reinforced the notion that being different is OK.

Most of the genuine friendships I had found are from GNITS days!!!

Love GNITS!!!

G.Sirisha

Inspector, Central Board of Indirect Taxes and Customs,
Department of Revenue, Ministry of Finance

I had a wish to work in a Central government organisation since my college days. I thought I would prepare while working in a software job. After working in Accenture for 8 months (got through campus placement), I realised that getting into a central government post is not that easy and has a huge competition. So I resigned from Accenture.

Then I started preparing dedicatedly for that. Soon after I started my preparation, I got a job in Union Bank of India.

My parents encouraged me to take that opportunity. So, I joined the bank and continued my preparation. I used to study after banking hours. That was quite a tedious task, but had to reach my goal. After 2 years of dedication, I could crack the exam that was conducted in 2020 through which I got selected as Central Excise and Customs Inspector. I'm now working in Bengaluru West Commissionerate.

Tu Turno - Bengaluru

Sumedha Maramraju

In the fast paced world of Information Technology, my journey from a college going student to a Program Manager/Global DEI leader is a testament to hard work & commitment for my personal development.

I started my career with JP Morgan Chase graduating from GNITS with a degree in Information Technology in 2012. While my first stint was as a Middleware Infrastructure engineer, later with my aspiration to learn, I took up the responsibility of Devops Engineer. With the knack of driving critical migrations end-end, quickly caught the attention of senior leaders and I was entrusted with increasingly complex

projects. In my 5 years stint in New York, I spearheaded initiatives and was instrumental in leading Change Management and various Infrastructure builds & migrations.

As the IT landscape evolved, so did I. I pursued advanced certifications in Agile, product management and leadership, staying ahead of the industry trends. This has helped me take a larger role as an Agility Lead, overseeing the Agile & product transformation across a larger portfolio. In this new capacity, I championed the implementation of agile methodologies, fostering a culture of collaboration and adaptability.

Beyond my current role as a Strategy & Business Services Program Manager, I strongly promote a culture of inclusivity and Lead Diversity & Inclusion across 6 countries for Network Product Line of Business at JP Morgan. My journey from a Middleware Infrastructure Engineer to an Enterprise Level Strategy Program Manager or a Global DEI Leader was only possible with continuous learning, adaptability, and visionary leadership in navigating the ever-changing landscape of Information technology

Currently she is working in Group-B cadre at the Directorate of Enforcement, Bengaluru as Asst. Enforcement Officer for enforcing economic laws and fighting economic crime in the country. During her tenure at Directorate of Enforcement, she received appreciation for her work in the Department from her higher rank officials, by way of receiving certificates in recognition of her excellent performance, extraordinary efforts, commitment and exceptional contribution in accomplishment of entrusted responsibilities.

Nikhila Putcha

I belong to the 2015-19 batch of B. Tech. of ECE branch.

Qualifications:

Executive Education in Entrepreneurship from IIM Bangalore

Received a full scholarship from Goldman Sachs 10,000 Women for pursuing the program.

Awards & Recognition:

Patent Granted for an AI-based financial planning system

System and method for automating the complete life cycle of personal finances using Artificial intelligence, blockchain and other cutting edge technologies for secure financial planning and transactions.

Featured in and recognised by Forbes India DGEMS as the Select 200 Founders with Global Business Potential

Forbes India DGEMS is a pan-India summit recognising innovative founders and companies with global business potential.

Money planned was part of the Select 200 companies that have made the cut among lakhs of applicants globally.

The founders of Moneyplanned, Nikhila and Sameer were recognised by Forbes India DGEMS as “eXtrepreneurs” - entrepreneurs capable of borderless expansion as a testament to their leadership abilities, innovation potential and growth calibre demonstrated.

The shortlisting of the 200 companies and founders was made by Forbes India & DGlobalist after vetting on various parameters including their growth in the domestic market, unique business proposition, fundraising and ownership of intellectual property rights. These considerations ensure that the founders have proven themselves in their native markets and they have a suitable market fit outside of their home country.

World Economic Forum - Participant from India

Honoured to represent the startup community from India as a participant at the World Economic Forum.

At Davos, I engaged in a series of high-profile events alongside pioneers from the AI and Blockchain startup ecosystems, esteemed state ministers from India and Europe, and thought leaders from publications like Financial Times, among others.

This platform allowed me to contribute to pivotal discussions on global economic trends, technology's impact on society, and the future of innovation, while also absorbing invaluable perspectives from world-renowned experts and policymakers. It was a privilege to bring my insights to this international arena and to help shape the conversations on economic and technological advancement.

Lead Like a Girl National Fellow

Shenomics "Lead Like a Girl" Fellowship is a one-of-a-kind 6-month immersive program designed to help next-gen young women leaders through mentorship, coaching and leadership training in the context of mindfulness.

- Selected in the Top 40 for the 2020 Cohort amongst lakhs of applicants pan India
- Coached and mentored by leading women entrepreneurs and global leaders
- Designed and implemented an impact project on the theme "Financial Awareness for Women" by conducting financial planning workshops for 1000+ womxn encouraging them to take charge of their big financial goals
- Created comprehensive content for helping women become more financially literate and aware about investments and financial goal planning

Observe Now 40 Under 40

Honoured with the 40 Under 40 Award for Exemplary Leadership in the Startup ecosystem of India for the year 2021-22 among 1000s of applicants across India.

This award was felicitated by Maneka Gandhi (House of Parliament) and the jury members include stalwarts in the tech industry like Executive Directors at JPMC and Unicorn Startup Founders.

Entrepreneurial Spirit Award

Conferred "Entrepreneurial Spirit Award" by the L&D International Summit & Awards conducted by Asis Sen Consulting Group.

Mr. Asis Sen is a visiting professor at Harvard University and an esteemed jury with panelists from across the globe has been appointed to identify the victors for this nomination.

This recognition was given to Top 3 Young Entrepreneurs from India who are contributing to the Indian startup ecosystem through innovative technology and services.

Experience

Co-founder of Moneyplanned

MoneyPlanned is an AI-driven platform transforming and radically disrupting the space of personal finance. It's a simple and easy one-stop platform for planning, executing, and tracking personal financial goals.

- Raised ₹ 7 Cr in funding from US based investors like Expert Dojo, Dot Capital, Angellist along with Indian VCs like Inflection Point ventures and more.
- Featured in Forbes India, Entrepreneur, Your Story, Business Insider and several other popular media houses.
- Incubated by NSRCEL IIM Bangalore, Huddle and other top accelerators.

Payyavula Darshana

GNITS is like a home to me. The best and the most memorable part of my life was at GNITS. It helped me realize my interests and passion. This was also a place where I had a huge recognition as a Table Tennis player, thanks to the dynamic Surya Kumari Madam. From the period 2015-2019, I had an opportunity to participate in around 30 tournaments and win around 45 titles for GNITS. I will always be grateful for this college as it also gave me an opportunity to represent JNTU-Hyderabad in All India University Nationals - south for four consecutive years.

I was always a backbencher and never took my classes seriously until right here at GNITS, sitting in the Control Systems class, when I realized my interest in Embedded Systems. I was fascinated by how a small chunk of code can control the hardware and do wonders. At one point, I was so in love with control systems that I was making online tutorials on Unacademy. Thanks to the amazing faculty at GNITS, who not only taught me the concepts but also made me realize my interest and passion.

GNITS got me my first Job. I got into Accenture as an Application Developer in 2019. As a EEE student, I always wanted to not forget my roots and interest in semiconductors. Hence, I quit my job to pursue masters and got an M.Tech degree - Embedded Systems in 2023. (PES University, Bangalore) Things went well and I got placed in Samsung Semiconductor India Research, Bangalore. I am currently working as a Senior Engineer in Firmware development. I can pretty much say that I cracked my dream job, thanks to the realization I had in 2018 control systems class about my passion. In the past one year at Samsung, I worked on developing firmware for SSD's - One of which recently got launched in the market. I feel so proud to see my work out there.

Working at a good company in an interesting domain clearly makes a difference. I was given SPOT award twice in the past year for my contributions. Carrying my GNITS sports legacy, I am representing Samsung in sports. I recently won a few championship titles in Table Tennis, Cricket at the Cadence - Inter semiconductor corporate tournament 2023, Samsung TT championship 2023, Samsung Cricket Championship 2023. I would always be grateful to GNITS for giving me some amazing memories, valuable learnings and for making me realize who I want to be.

Tu Turno - Bengaluru

Kiranmayee Gangalam

My journey began in 2020 when I joined GNITS as a lateral entry student. Having completed my diploma in Computer Programming, I embarked on a journey filled with passion and determination. The pivotal moment came when I secured an internship at DRDO, setting the stage for my exploration into the realms of technology.

In my second year of BTech, I delved into competitive programming and immersed myself in internships, focusing on cutting-edge fields such as AI & ML and Cybersecurity.

One of my proudest achievements during this time was cracking Flipkart Grid 3.0 in my second year, a feat that singled me out as the only CSE student from my batch.

Determined to enhance my skills, I actively participated in workshops conducted by prestigious organizations and universities, including IIIT Hyderabad. The opportunity to work on my major project under the guidance of senior professors from IIIT Hyderabad at GNITS was an honor, and receiving the Best Major Project Award was a testament to the dedication and hard work invested.

Venturing beyond the academic sphere, I participated in numerous events and hackathons, such as Google Cloud, JPMC Code for Good Hackathon, and Alegorithm ABInBev Hackathon. In my third year, I triumphed in the challenging ABInBev Company hackathon, securing a coveted 6-month internship in Bangalore.

Balancing my technical pursuits with my passion for classical dance, I seized every opportunity to perform in college programs. The recognition and encouragement from GNITS Principal, Mr. Ramesh Reddy, and the Multi-Talented and Outstanding Performance Award from Dr. Sharada mam were moments that added colors to my journey.

As I entered my final year, the culmination of my efforts materialized in the form of multiple placement opportunities. Choosing ABInBev not only aligned with my desire to complete the 6-month internship but also paved the way for a **full-time role**.

In the workplace, I belonged to the select group of students who successfully converted their internships into full-time positions. The challenge was substantial, considering there were a total of 70 students, and only 17 managed to secure the conversion - a feat I proudly accomplished.

Today, I can proudly say that I am a **Senior Data Analyst** at ABInBev, the World's Largest Beer Company.

This success story is a testament to the skills, knowledge, and opportunities GNITS has provided me. I secured 9.4 CGPA and my journey from a lateral entry student to a professional in a global company wouldn't have been possible without the guidance, support, and nurturing environment of GNITS.

Tu Turno - Bengaluru

As I continue to grow in my career, I carry with me the lessons learned and the memories forged during my time at this esteemed institution.

Thank you, GNITS, for being the cornerstone of my success.

Currently she is working in Group-B cadre at the Directorate of Enforcement, Bengaluru as Asst. Enforcement Officer for enforcing economic laws and fighting economic crime in the country. During her tenure at Directorate of Enforcement, she received appreciation for her work in the Department from her higher rank officials, by way of receiving certificates in recognition of her excellent performance, extraordinary efforts, commitment and exceptional contribution in accomplishment of entrusted responsibilities.

Yashika Parelkar

I'm Yashika Parelkar, a girl who is born and brought up in Hyderabad and takes immense pride to be an alumni of GNITS.

Upon graduating in CSE in 2020, I delved into the IT industry for three rewarding years. Starting as an associate software engineer, I continually tried to nurture my technical skills and contributed to innovative projects. Realizing a passion for wellness, I began sharing my journey on social media, thus transitioning into a beauty and lifestyle influencer. In balancing my IT career and

newfound passion, I not only try to put my best foot forward in both the worlds but also try to inspire others to embrace diverse interests and pursue multifaceted success.

Tu Turno - Bengaluru

Kavitha Pocha

I am Kavitha Pocha (2012-16 ECE), currently working as Senior IT Engineer in Honeywell, which is a product based company majorly offering aerospace products and services across globe. Through campus placements in GNITS, I've joined Infosys in 2016 from where my professional journey has started. Along with learning Technologies, I have used my time in Infosys to pursue MBA degree in distance education .

GNITS has always played a key role in shaping up my career and making me the committed person that I am today to receive multiple appreciations in my career both from Infosys(previous) and Honeywell leadership (current) and looking forward for more. Thank you for providing a platform to express my gratitude towards the college. I'll always be grateful for opportunities that were provided to us during the course of education in GNITS. They help us to be prepared to conquer the world and equip us to lead a successful career journey.

Kudos to GNITS for being a great learning platform and opening doors to successful careers of many women across the world. I feel proud and honoured to be part of such renowned and prestigious institution.

Lavanya Yaleti

Hello all. This is Lavanya Yaleti of EEE (2012-2016) batch. I was placed in Infosys through campus placement in GNITS. After working for nearly 3 years as the system engineer , I left Infosys as Senior Software Engineer and joined as Automation Analyst at Qapitol QA, currently I am leading the Automation and Devops team for the Flipkart Client on various E-commerce projects. I would like to share few learnings made at GNITS

I learned to be a good team player and leader by being the part of the GNITS throw ball team and gained the management skills by taking part in organising the events held at College and Hostel. and I also gained a lot of technical and presentational skills by participating in various Inter and Intra college/University Technical paper presentations as part of this i got an opportunity to share my papers with NIT Warangal, MGIT and JNTUH.

This has only been possible due to opportunities and avenues I was provided at GNITS for my overall development. I would like to thank all the professors and faculty for all the support and guidance. I'm grateful and Thankful to my college for providing me such a wonderful platform to achieve my dreams.

V K Manasa

During my school days, my dad used to drop me and pick me up every day. On the way, I used to see a huge building named GNITS and I would ask my dad about it. He would tell me that it's an Engineering college and he wanted me to study there someday. However, I didn't take it seriously at that time and continued with my studies.

After completing my 10th standard, I wanted to become a Chartered Accountant and took commerce as my mainstream. But due to some reasons, I had to change my field back to science. As I come from an ICSE background, I had basic knowledge of Java Programming from school. After I got my entrance exam results, I realized that I was not going to get the branch of my choice, which was Computer Science or Information Technology. Despite this setback, I never lost hope and joined ETM. Fortunately, there was an extra round of counseling, and due to my merit, I got the branch of my choice.

When I started my engineering course, it was overwhelming for me to get accustomed to the new surroundings. There were almost 40 different thinking people around me, and standing out among them was hard. During my 2nd year, the COVID-19 pandemic started, and that's when my golden period began. I spent more time coding and participating in hackathons. Some days, I would spend hours practicing new algorithms and solving interview questions with my friends. My team and I won the Best Project award during my 3rd and 4th years, which boosted my morale. With that energy, I successfully cracked my first job interview with ServiceNow and received an internship + FTE offer.

After joining ServiceNow, I realized that learning is a continuous process. What we learn as students is different from what we do in the industry. I had never understood the actual difference between developing and testing, except for the theoretical part. However, with time, I learned. In the past year, I have worked on different projects related to various domains, written automation scripts for testing, and achieved ServiceNow's prestigious LLAMA Award for my performance.

In conclusion, I am forever grateful to GNITS, my faculty, and my friends for this wonderful journey. No matter where I stand today or in the future, I will always cherish this experience.

Tu Turno - Bengaluru

B. Lakshmi Soundarya

I have started my career in Bosch.

With the knowledge I have acquired from GNITS, I always wanted to be a part of core companies. So Bosch was like a dream company to me.

The journey from being a fresher to experienced person in same company makes me feel happy. I work on the ADAS technology where we provide software for the Driverless Cars. Me being a part of the Ethernet topics reminds me of the Networking Concepts, STLD topics and many more which I have learnt from here makes my work easier. It is always said, if the basics are strong, it can make your

tasks easier. Apart from this I am the Core Team member for the Associate Connect team at my section level where we represented our team in the marketplace. I am the organiser for various sports events at my company. With the exposure towards all the extracurricular activities which I have been encouraged by my faculty at GNITS, I continue the same at my company as well. I have successfully completed my German A1 course with distinction at my company. I would like to thank the GNITS Faculty who has supported me to be in this stage.

Gokavaram Pranitha

I have been working at Accenture for the past 4 years and trained in informatica but took a networking project as I am an ETM student interested in networking. I have performed really well and got promoted twice within 3 years (as per Accenture promotion should be provided after 22 months) and been awarded with ACE excellence awards. Though I am SSE level employee I have been assigned with Team Lead tasks and I have been leading one team.

After 3.2 years I have relieved from the project and got an Informatics project where I got a chance to work on almost 3 softwares as it was a development project. The struggle in the initial 5 months was all hectic escalations and handling defects. But it was a learning phase for me as I was an electronics student with not much knowledge or hands on experience in software. I would work the whole day and night to complete the work and understand the concepts. Finally after 8 months I have been awarded again with the ACE excellence award and good rewards. But that feeling was too special as the people who were escalating me on things started praising me and nominated me for reward as well.

GNITS indeed taught me the life skills that I need to sustain in the big world outside the college.

P. Sowmya

I am Sowmya from Hyderabad. I have studied IT in GNITS from 2016-20. I come from a middle-class background. My family situations has motivated me to study hard. I was topper of my school and Inter college. I've secured a rank below 10k in EAMCET, which helped me get a free seat in GNITS.

Joining GNITS is one of the best decisions of my life. Apart from providing good placements, it has all facilities that would help in all round development of individual. It has helped me in improving not only my technical skills but also soft skills. I was one of the IEEE coordinators from my class. During my tenure, I have organized many events in the college.

I was selected as an Intern in TeraEdgeDigital-startup during 3rd year. I have also done an internship in Apple in GNITS during my final year. They have helped me learn latest web technologies. I have been selected for Software Developer role in Hexagon. It's been more than 3 years since I am working in Hexagon. I have also been promoted to Senior Software Developer role.

Finally, I would conclude by thanking all my faculty, placements cell and management of GNITS and my dear friends, colleagues and family for helping and guiding me whenever I needed.

Bala Krishnaveni

I am Bala Krishnaveni A E 2011 year pass out batch with B. Tech. in Information Technology. I have 12 years of IT experience. My journey starting from being a developer to team lead is a wonderful journey. I want to share my success story which is comprises of my hard work, proactiveness, leadership skills, knowledge in technology areas and balancing work life.. all helped me reach the present status.

I have been working from multiple locations with different cultured people where there are no language barriers, partiality etc. What mattered was the individual knowledge and caliber.

I would be thankful to my parents, spouse, kid who supported me in all aspects during tough times and long hours of work.

When you believe in what you are doing rest everything will fall in place with respect to professional and personal life.

Tu Turno - Bengaluru

Tejaswi Pichuka

Starting from my school years, I have always been the kind of student with a keen interest in technology. I enjoyed participating in various extracurricular activities alongside regular classes, always seeking to try out something new. This quality of mine has helped me explore new horizons and grow in a comprehensive manner.

Upon entering GNITS with an open mind and without any specific expectations, I chose IT as my major and gradually delved into the core of technology. I vividly recall the first day of college when we were introduced to students who had secured placements in top companies during an induction program led by Narendra Babu Sir. In that moment, I set high aspirations for myself, aiming to achieve something that would make the college proud.

GNITS provided me with the flexibility to explore new opportunities without the fear of compromising academics. I am deeply grateful to our placement officer, Dr. Narendra Babu Sir, and HOD, Dr. Ravi Prakash Reddy Sir, for their unwavering support whenever needed.

I feel fortunate to have met amazing people at GNITS who have been an integral part of my wonderful college experience. Engaging in numerous hackathons, representing the college at state and national levels, I developed a love for coding and participated in various contests. Additionally, serving as the president of our photography club, PHILANTO, was one of the best decisions I made. It helped me develop skills to navigate challenging situations, make thoughtful decisions, and enhance my leadership skills, contributing to my growth as a team player. I was honored with the title of "Young Promising Engineer" for our branch, secured an internship at Flipkart that transitioned into a full-time position, and received a PPO from JP Morgan Chase. Currently, I am working as a Software Engineer at JPMC.

It has been more than 6 months since I joined JPMC, and the experience has been incredibly enriching. While there were challenging situations, the skills acquired during college equipped me to face them with ease. Understanding the functioning of such a prominent firm and witnessing how technology streamlines everything has been fascinating.

The memories of this college, the people I met, and the fun we had, will always hold a special place in my heart. One valuable lesson I took from my college experience is to enjoy what you do, and the results will follow!

K V N S Sriveena

Software Developer at UL Solutions Pvt. Ltd, Bengaluru

After graduating from GNITS in 2018 with a degree in Electronics and Communication Engineering (ECE), I joined as an Associate Software Engineer in Accenture-Bengaluru through campus placements. During my time in the organization, I actively participated in training programs held at Accenture-Pune and took on additional certifications & responsibilities, which helped me enhance my expertise in IT domain.

Worked on few US Financial Projects and contributed significantly for the company's growth. I was involved in developing and maintaining software applications, gaining valuable technical skills and industry exposure. Received 'Best Performing ASE' title and 'Star of the Month' awards during Performance Appraisal Assessments.

Seeking to broaden my skill set beyond technical aspects and strong desire to go for higher education, I enrolled in Working Integrated Learning Programme (WILP) of BITS PILANI where I pursued 'M. Tech in Software Systems' (2020-2022).

The 2-year M. Tech course of BITS PILANI, WILP in 'Software Systems' discipline deals with software related technical modules, exposing me to a multitude of problem-solving scenarios by applying technology, with rigorous evaluations that have refined my skills. The dissertation work done in the final semester has been published in 34th symposium of ISMAS and CVR Journal. Though learning while earning is the toughest task, it provided me both professional and personal career growth.

Particularly, securing CGPA - 9.1 and being one of those top 10 percentile candidates is a gratifying victory and a testament to the invaluable support and guidance provided by several distinguished Professors, Managers at Workplace, and family.

The acquired knowledge facilitated me to progress to the next stage in my professional journey upon becoming a part of UL Solutions Pvt. Ltd., Bengaluru in April 2021.

Throughout my career journey, the foundation laid during campus placements played a crucial role in shaping my professional trajectory. The combination of technical proficiency, continuous learning, and a willingness to embrace new challenges has been key to my success so far.

Tu Turno - Bengaluru

Shreekruthi Reddy Nukala

I am Shreekruthi Reddy Nukala from EEE department 2019-23 batch. I am working at **Accenture** as a Packaged App Developer. My journey in the world of engineering began with a passion for understanding the intricacies of the physical world and a curiosity that constantly drove me to explore the boundaries of what is possible. The moment I stepped into this campus, I knew I was about to embark on a voyage that would not only challenge my intellect but also mold me into a problem solver and innovator.

In the initial days, the sea of new faces and the vast expanse of knowledge before me seemed daunting. However, with each passing semester, I found my footing, fueled by the support of dedicated professors and the camaraderie of my brilliant peers.

The classrooms became laboratories of discovery, and every assignment was an opportunity to apply theoretical concepts to real-world problems.

One of the defining aspects of my college journey has been the diverse range of projects and collaborations that I have been fortunate to engage in. From designing innovative solutions for engineering challenges to participating in hackathons that tested the limits of my creativity, each experience has been a stepping stone, pushing me to think critically and work collaboratively.

As the coursework deepened, so did my appreciation for the interdisciplinary nature of engineering. The blend of theoretical knowledge and hands-on applications has not only equipped me with technical skills but has also instilled in me a holistic understanding of the field. Beyond the classroom, my involvement in extracurricular activities and clubs has enriched my college experience, allowing me to develop leadership skills and forge lifelong connections.

However, like any meaningful journey, there were hurdles along the way. The late-night study sessions, the moments of self-doubt, and the occasional setbacks served as reminders of the resilience required in the pursuit of knowledge. Yet, it is precisely these challenges that have fueled my determination to persevere and emerge stronger.

Today, as I stand on the precipice of graduation, I am filled with a sense of accomplishment and gratitude. The friendships forged, the knowledge gained, and the skills honed have laid the foundation for a future where I aspire to contribute meaningfully to the world of engineering.

In closing, I extend my deepest appreciation to the faculty who have guided me, the friends who have supported me, and the institution that has been the backdrop to this incredible journey. I am excited about what lies ahead, and I look forward to applying the knowledge and skills acquired here to make a positive impact in the world.

I carry with me the indelible imprints of college, a transformative odyssey that sculpted the contours of my identity and illuminated the path to a future yet to unfold.

Achievements at GNITS

- ❖ I am honoured to serve as the Joint Secretary of **ISTE club**, where I contribute to the coordination and management of our club's activities and initiatives.
- ❖ I achieved **First prize in the mini project**. It was a rewarding experience, and I'm proud of the hard work and dedication that went into it.
- ❖ Led the planning and execution of two **IGNIUM** fests, showcasing strong organizational and leadership abilities.

Manaswini Nagasamudram

I am Manaswini Nagasamudram of 2018-22 batch. My journey as I navigated the world of B.Tech. in Computer Science is one filled with challenges and triumphs. From late-night coding sessions to the thrill of solving complex algorithms, each day brought a new opportunity to learn and grow. Collaborating with passionate classmates and facing the excitement (and occasional frustration) of debugging code became a routine.

My Internship, it provided a glimpse into the professional realm, translating classroom knowledge into real-world applications. The quest for balance between theoretical concepts and practical skills was ongoing. The camaraderie formed during group projects and the joy of successfully executing a software project were unforgettable highlights.

As the semesters unfolded, the evolution from a novice to a more seasoned coder was evident. The exposure to diverse programming languages, databases, and cutting-edge technologies expanded the horizon. Challenges like tight deadlines and demanding projects polished the ability to think on my feet.

The never-ending quest for staying updated with the latest tech trends became a lifestyle. Hackathons and coding competitions fuelled the competitive spirit, pushing boundaries and proving that innovation knows no bounds. Despite the occasional sleepless nights, the satisfaction of seeing lines of code come to life made it all worthwhile.

Ultimately, the journey as a B.Tech. Computer Science student is not just about acing exams but about embracing the dynamic world of technology, continuous learning, and shaping a future where every line of code contributes to something meaningful.

Tu Turno - Bengaluru

Danta Pravalika

During my third year of B.Tech at GNITS, I secured a year-long internship with the hope of transitioning to a full-time role post-graduation. However, unforeseen circumstances led me to accept an apprenticeship for an additional year with the same stipend.

Despite the setback, I remained dedicated. Days were filled with work, and nights were devoted to preparing for new opportunities. Alongside my commitment to the apprenticeship, I faced the harsh reality of job hunting. I applied to more than 100 companies, only to receive countless rejection emails. However, I refused to be disheartened. My perseverance eventually paid off when, just two months into the apprenticeship, I received the incredible news that I was now a Full-Time Employee!

This journey taught me the invaluable lesson that success often follows persistence. It's not just about securing a job; it's about turning challenges into stepping stones. Navigating Bangalore as a newcomer added another layer to the story. Adapting to the city's rhythm and work culture became integral to my growth. Looking back, I appreciate the growth and strength gained from facing the unexpected and overcoming the hurdles of a daunting job search. To my fellow GNITians, whether familiar or new to the city, keep pushing through uncertainties; resilience shapes success, making the journey always worth it.

Javali Bathula

I am Javali, a proud graduate of GNITS from the 2021 batch. My journey began with securing the 993rd rank in EAMCET, paving the way for my admission to GNITS.

During my time at college, I endeavored to secure a position with esteemed companies. My first campus interview was with JP Morgan, although I did not secure a role there. Undeterred, I pursued numerous other opportunities, receiving offers from several companies. However, these offers didn't align with my aspirations for a higher package and a particular work environment.

Determined to achieve my career goals, I sought opportunities off-campus as well. This led me to secure a position at Airtel (Airtel X Lab), a company that aligned perfectly with my ambitions. At Airtel, I have excelled, garnering recognition for my contributions and performance within the organization.

This journey has been one of perseverance, resilience, and the pursuit of excellence. Each step, whether challenging or triumphant, has shaped me into the professional I am today.

Rajarajeshwari Chanda

I'm Rajarajeshwari Chanda, from EEE-B 2017-2021 batch, presently working in L&T technology services as Engineer.

To share my experience at GNITS, I can sum it up in two words: GNITS and GRAAKS. GNITS provided me with excellent faculty and wonderful friends, and our close-knit group, GRAAKS, played a pivotal role in making my BTech years truly memorable. Pursuing engineering was a dream come true for me, made possible by a scholarship that secured my seat at GNITS, a journey that began with my EAMCET rank. GNITS consistently inspired individuals, fostering motivation not just in academic pursuits but also in extracurricular engagements. As a student, I took advantage of this supportive environment by delivering paper presentations and actively participating in events held during fests. In contrast to my experiences in Intermediate and school, where the emphasis was solely on academics, GNITS provided a more balanced approach that encouraged a broader range of activities. Despite these opportunities, I acknowledge that I may not have fully capitalized on them.

The transition to online classes during our 3-2 period, necessitated by quarantine measures due to Covid, significantly altered the academic landscape. Nevertheless, we successfully completed the remaining BTech coursework online and secured placements in reputable companies. After joining L&T, I understood how our college helped us in working in IT though I was from EEE. Placement preparation, faculties and open electives helped me to progress in L&T. I joined L&T as a validation engineer and solved few issues based on which I was moved to Debug team. So, presently working on issues which initially I reported as failed as part of validation engineer and now making them pass by giving fixes as debug engineer. Received Star of the month and SPOT award in these 2 years journey of L&T. To my fellow alumni, current students, and aspiring minds, may this narrative serve as a testament to the resilience that resides within each of us. Embrace the challenges, celebrate the victories, and never underestimate the transformative power of education. As I step into the future with gratitude for the past, I carry with me the indelible lessons from GNITS, and I am excited for the unwritten chapters that lie ahead. I finally thank all my 3 F's (Family, Friends, Faculty) for always staying with me and helping me even during my tough times.

Summaiya Mehveen

"From GNITS to Corporate: A Journey of Growth and Success"

Upon graduating, I had the privilege of being selected through campus placement by Accenture, a global leader in consulting, technology, and outsourcing. It was a dream come true, yet the unexpected twist was the location of my training - Bangalore. Fast forward 1.2 years, and I find myself crafting my success story as a proud Accenture professional.

The initial months in Bangalore were a whirlwind of challenges and new experiences. Moving away from home for the first time was a significant adjustment,

and the bustling city of Bangalore seemed both exciting and overwhelming, but it was also an incredible opportunity for personal and professional growth. The city, with its diverse culture and fast-paced life, became my new canvas to paint my journey. Every challenge became an opportunity to learn, adapt, and thrive.

The training period at Accenture in Bangalore was intense, but my background in extracurricular activities proved to be an unexpected asset. One aspect that significantly contributed to my success was my involvement in extracurricular activities during my time at GNITS. As a radio jockey on campus radio and an active member of the art club, I developed communication skills, creativity, and the ability to work collaboratively. Little did I know that these skills would play a pivotal role in my journey at Accenture.

The transition from a student to a professional was undoubtedly challenging, but the lessons learned at GNITS served as a strong foundation. Today, as I reflect on my journey, I am grateful for the support and guidance received at GNITS. The nurturing environment, dedicated faculty, and the emphasis on holistic development have played a crucial role in shaping who I am today. Thank you, GNITS, for being the launchpad for my journey into the professional world.

Gali Poojitha

Software Engineer, Bank Of America

Greetings! I Gali Poojitha an alumni student of GNITS from CSE-B 2023. Firstly I would like to thank GNITS for not only making my life brighter but also giving me this great opportunity to share my success story, transitioning from dynamic environment of campus life to the challenges and opportunities of the professional realm.

Just like every other student I stepped into GNITS with holding dreams. GNITS gave me a platform to prove myself and achieve success. B.Tech life was awesome. The campus ambiance always made me connect to the nature which always uplifted me in all my up's & down's having an aim isn't enough to achieve goals. The guidance for achieving it plays a crucial role. All my lecturers, campus placement team everyone helped me to achieve it ,to which I will always be thankful.

As I being to B.Tech from Diploma. Entering college into 2nd year was challenging and bit nervous. But all my friends who up holded my hand and made me one among them. The spirit of learning new things, made me step ahead to reach my goals. For which I would always be thankful. Days passed with much fun and joy and entered into final year. Every ambition of a student to get graduated with flying colors holding a job in hand.

And the real battle within yourself starts from here. I made myself capable enough with all the known programming languages and technologies. The worst part in student's life is rejection. The word "NOT SHORTLISTED" really hits very hard.

Facing multiple rejections finally after completing 3 rounds of interview, got placed in BANK OF AMERICA. This made me know that hard work really pays off. This gave me a hope a ray to the life path and how to live a life . Just to say in one word college life was not less than a roller coaster ride.

Having great pride and much enthusiasm I stepped out of college holding degree with first class distinction. Anyone could give the guidance of how to study, what to study but I would like to share beyond that.

Engineering is not just a phase of your life, instead it's the baseline that enroutes you towards your goals and destination. It's not just about Projects, Labs, Internals, Externals etc.,

It's about learning in each phase of your life, it teaches you to analyze all the situations appropriately that you'll come across in life just as you analyze the problem statement in labs while coding.

It's about finding solutions for all the problems that occur in life just as you build a wholesome project with just a single line of problem statement. And what not, this is the part that teaches life to you, it stands as the fundamental

foundation that shapes your life. Last but not the least. I would like to spot the light on the major person's who made my journey successful. My parents Gali Ganesh Kumar and Gali Anitha and my family members who supported me and encouraged me not to give up and made me to give my best .

College isn't just about academics, it's a mosaic of friendships, challenges and self-discovery. Cherish every moment, learn from your setbacks and keep growing even more stronger. Explore your passions and remember, the journey is as significant as the destination. This is an adventure of lifetime!

Tu Turno - Bengaluru

Navyasree Maddineni

I am Navyasree Maddineni, a CSE graduate of 2021. I am currently working in Societe Generale as a full stack developer. I feel immense pleasure and proud to be GNITSian as I joined the institute with lot of curiosity and eagerness to learn, meet new people but without much thought of future with a fresh mind. The staff, with excellent skills, good grip on the subject, and positivity and my fellow mates helped me not only in gaining knowledge but also made me realise my interests of what i wanted to be in future.

After few rejections at entry level and few at the interview level finally I bagged a full time offer in Societe Generale along with the internship. All the struggle during that period was full of learnings and an encouragement to try harder which is completely worth. I feel that was the best decision I took of joining SocGen which is completely in alignment with my ambitions and a very good work life balanced environment with such great people to work with.

I will forever be thankful to GNITS for a great time there with lots of learnings, knowledge, life time lessons, fun times and friends for life. It was a rollercoaster ride yet beautiful one. I wish the college continued success in educating future professionals.

Akhila Devaragatla

Upon graduating, I had the privilege of being selected through campus placement by Accenture, a global leader in consulting, technology, and outsourcing. It was a dream come true, yet the unexpected twist was the location as a Bangalore. Fast forward 1.2 years, and I find myself crafting my success story as a proud Accenture professional.

The initial months in Bangalore were a whirlwind of challenges and new experiences. Moving away from home was a significant adjustment, and the bustling city of Bangalore seemed both exciting and overwhelming, but it was also an incredible opportunity for personal and professional growth. The city, with its diverse culture and fast-paced life, became my new canvas to paint my journey. Every challenge became an opportunity to learn, adapt, and thrive.

The transition from a student to a professional was undoubtedly challenging, but the lessons learned at GNITS served as a strong foundation. Today, as I reflect on my journey, I am grateful for the support and guidance received at GNITS. The nurturing environment, dedicated faculty, and the emphasis on holistic development have played a crucial role in shaping who I am today. Thank you, GNITS, for being the launchpad for my journey into the professional world.

Sasirekha MSVL

I am Sasirekha MSVL. Currently working at Flipkart. I am a 2022 pass out. When I entered the college, I knew I wanted to do something but wasn't sure of anything. GNITS has opened me a lot of doors of opportunities to prove myself worthy. I was selected as a Kiran Girls scholar which was conducted by Persistent Foundation from there until I got placed in Flipkart as a software developer it was a roller coaster ride.

I participated in multiple hackathons, workshops and webinars. I have done few internships and joined Streetcause which actually helped me a lot and shaped my attitude and taught me that in order to sustain in life you can literally do anything. I was part of a research project where I went out to meet HCU professors and discussed the projects they are doing and we could get a collaboration with them for our projects. My professors never let me give up on anything.

It's not that I have always aced all the things I started working on. I wanted to try entrepreneurship but that couldn't happen because our idea didn't have that potential. I wanted to ace in table tennis but that didn't happen. I was rejected by multiple companies for both internships and fulltime opportunities. But I didn't stop exploring.

Now working in Flipkart people recognize me for my commitment and hard work. I think I have attained them in my college.

One thing I still regret is that because I was a day scholar, I had to leave to home sharp at 4pm in college bus. So, I couldn't play sports. After all this I just want to say that don't leave any stone unturned and keep exploring in life. Be consistent if you like something.

Dear Esteemed Alumni,

I am thrilled to present the Alumni Coffee Table Book, a testament to your incredible achievements. As the Editor, I've had the privilege of compiling your inspiring stories of triumph, resilience, and innovation. Each page reflects the remarkable impact our alumni have on diverse fields worldwide. From groundbreaking ventures to societal contributions, your success is our shared pride. I encourage you to dive into these narratives, reconnect with old friends, and celebrate the collective excellence we've achieved. Your stories are not just individual triumphs; they are the chapters that continue to define the legacy of our alma mater. Additionally, congratulations on launching a new alumni association chapter in Bangalore! We look forward to your continued engagement with the association.

I place on record my gratitude to Mrs. Madhuri Pocha, Asst. Prof. ECE., and Mrs. Ujwala, Asst. Prof. EEE., for their dedicated support in compiling this Coffee Table Book.
