| 6. Give SUGGESTIONS by which you think the usefulness of this session can be improved. | | |
| Conduction for more than one day might be better, missed sequence at some point due to lack of time and technical interruptions. | | |

Feedback Observations

1. All sessions were very relevant, the tools were very useful and discussion was encouraged.
2. Enable students to access virtual labs for hands-on learning anytime, anywhere.

Deficiencies Identified

1. Availability of limited or no access to hardware facilities can pose the biggest challenges in adopting technologies for teachers.
2. The non-teaching responsibilities and pressure to complete the textbook syllabus also discourage teachers to use ICT tools.

Remedial Actions Proposed

There should be a collaboration of teachers, policymakers, administrators, and other stakeholders in the decision-making process as well design and implementation of professional development programs.
