**CIRCULAR**

Information and Communication Technology (ICT) tools and virtual labs play a crucial role in education, research, and various industries. They provide a means to enhance learning, conduct experiments, and collaborate remotely. ICT tools and virtual labs have revolutionized education, research, and various industries by making resources and experiences more accessible, efficient, and flexible. They continue to evolve, enabling new ways of learning, experimenting, and collaborating, especially in today's globalized and digitalized world.

In This Context one day FDP is planned on "ICT Tools and VITURAL LABS The Future of Education" at GNITS in collaboration with Teenzclap & Accops and IWN .

**Topics covered in the FDP:**

Introduction to ICT and Virtual Labs

- 1) Understand Cost Effective Virtual Labs for education
- 2) Integration of ICT and Virtual Labs
- 3) Accessibility and Inclusivity with virtual labs
- 4) Integration of Virtual Labs with Assessment

**Resource Persons:**

Technology and management team of Accops , an international company providing ICT and Virtual Labs to institutes in South East Asia.

**Date of FDP: 15<sup>th</sup> September 2023.**
