

G. NARAYANAMMA INSTITUTE OF TECHNOLOGY & SCIENCE

for women
SHAIKPET, HYDERABAD
IEEE Student Branch

20-01-2021

IEEE STUDENT BRANCH

Webinar on:
5 THINGS I WISH I KNEW WHEN I WAS 21

Agenda:

- Opportunities one can explore in career.
- Equip with necessary skills to face the industry.

• Clear doubts about career

Date & Time: Saturday-23-01-2021, @5:30PM-6:45PM

Link to <https://tinyurl.com/y48b4dj9> Join the teams meeting.

Speaker:

Ms Krishna Mythili who is currently pursuing MBA and working as graduate teaching assistant at university of Rochester ,Sion Business School.She has interned as pathways operations manager in amazon.

She is naturally curious about almost everything in life. She received- The Best Engineering student of Telangana State Award, Young promising Engineer Award and Best outgoing student of Class 2015 award for excellence in academics, leadership, and extra-curriculars.

Later she worked at SAP Labs as a techno-functional consultant for aerospace and defense customers. She loves taking up challenges that stimulate different aspects of her intellect: creativity, recognizing patterns, strategizing, solving problems and making rational decisions.

Request HoD Sirs/Madams, to Communicate to dept faculty, B.tech & M.Tech students whats app group.

Request students to attend and get benefited from session.

Yours Sincerely

Ms. Krishna Mythili who is currently pursuing MBA and working as graduate teaching assistant at university of Rochester, Simon Business School. She has interned as pathways operations manager in amazon.

Miss Krishna Mythili, is naturally curious about almost everything in life. As an electronics and communications engineer, she designed and developed devices that help visual and speech impaired communicate without a need for interpreters. She received- The Best Engineering student of Telangana State Award, Young promising Engineer Award and Best outgoing student of Class 2015 award for excellence in academics, leadership, and extra-curriculars.

Later she worked at SAP Labs as a techno-functional consultant for aerospace and defense customers. In this customer-facing role, she understood the business of the customers, their goals and challenges, and provided product recommendations and go-live support along with developing custom features based on the business requirements. This helped her develop deep empathy, analytical, programming and problem-solving capabilities.

She loves the truth in mathematics and data as much as I enjoy understanding motivations and actions. At Simon (Known for its 'unabashedly analytical' STEM curriculum), She's developing expertise in strategy, operations, technology, business analytics, pricing, market research, product management, and leadership.

She loves taking up challenges that stimulate different aspects of her intellect: creativity, recognizing patterns, strategizing, solving problems and making rational decisions.
