Success Stories...

V. Sanjana Simha
ECE
Working: IAS officer trainee

Sanjana Simha (2012 – 2016), an Alumnae of ECE has secured 3rd rank in APPSC Group I service examination and was selected for the Deputy Collector post in Andhra Pradesh State Civil Services. She is the state topper of Telangana and also the topper of the 75th batch of Indian Revenue Service. She secured All India Rank 207 in civil services examination 2020. She was allotted the Indian Revenue Service. She also secured All India Rank 37 in prestigious Civil Services examination 2021. She has been selected to the coveted Indian Administrative Service. She is presently serving as Assistant Commissioner of Income Tax in NADT, Nagpur. She will be joining the Lal Bahadur Shastri National Academy of Administration, Mussoorie as an IAS officer trainee.

Dr. Patta Supraja
Branch: ECE
Working: Post-Doctoral
Fellow at IIT Hyderabad

Notable Achievements:

- ❖ Developed a "Home-based, RT-PCR free, low-cost, rapid, SARS-COV2 electronic diagnostic test kit", validated by CSIR-Center for Cellular & Molecular Biology (Ministry of Science & Technology, Government of India) in the year 2021.
- ❖ Received the "**Excellence in Research**" award for the academic year 2021-2022 from the Indian Institute of Technology Hyderabad.
- ❖ Received the "**Appreciation in Research**" award for the academic year 2018-2019 from the Indian Institute of Technology Hyderabad.

- ❖ Received "**Bharati Gold medal**" from G. Narayanamma Institute of Technology and Science (GNITS, affiliated to JNTU Hyderabad) for academic excellence during 2011-2015.
- ❖ Received "**Appreciation in Academics**" award from GNITS consecutively for the academic years 2012-2013, 2013-2014, and 2014-2015 for securing first place in B.Tech aggregate of marks.
- ❖ Received the "**Pratibha award**" from the Government of Andhra Pradesh for scoring the highest marks at the district level in the year 2007-2008.

Dr.PattaSupraja currently works as a post-doctoral fellow at IIT Hyderabad. Coming from a rural middle-class family, it was her dream to complete her Ph.D at an IIT. Despite not being heavily interested in physics, she chose ECE in B.Tech. Over time, she inculcated an interest through the extortionary motivation from the faculty of GNITS, which led her to receive the "**Bharati Gold Medal**" from GNITS for academic excellence during 2011-2015. With a strong motive towards Ph.D, she did not attend placements and prepared for GATE. Upon being ranked 2098, she applied for a directed Ph.D (IIT Hyderabad) and received an admission for Ph.D in Microelectronics and VLSI, EE department, IIT Hyderabad.

Having done research specifically in the Biosensors field, she developed a "**Home-based, RT-PCR free, low-cost, rapid, SARS-COV2 electronic diagnostic test kit**", validated by CSIR-Center for Cellular & Molecular Biology (Ministry of Science & Technology, Government of India) in 2021. During her Ph.D, she attended 4 conferences, published 9 journals, 2 book chapters and received 4 patents. She was also awarded the "**Excellence in Research**" and "**Appreciation in Research**" awards in the academic years 2021-2022 and 2018-2019 respectively from the Indian Institute of Technology Hyderabad.

With these achievements, her future objective is to get a Research-oriented, dedicated and reliable full-time Assistant Professor position with an opportunity for continuous growth in the reputed institution. She is also looking forward to utilize her teaching and research skills towards organizational growth and technological advancements.

ECE

25
years

Busireddy Swetha
Branch: ECE
Designation:
Asst. Enforcement Officer

Ms. Busireddy Swetha, born on 30th July, 1994 in Kadapa, Andhra Pradesh, had secured State Level Rank 531 in EAMCET and got admission into G. Narayanamma Institute of Technology and Sciences (For Women) for B.Tech, ECE.

She graduated in 2015 in ECE stream and got placed in Accenture, Infosys & Tech Mahindra through the college placements. After her graduation, she joined Accenture, Hyderabad and worked there for 4 years. Later, with the aim of serving the Government of India, she resigned and prepared on their own for Staff Selection Commission (SSC-CGL) and got selected as a Group-B officer in the Enforcement Directorate. Parallely, she appeared for the IBPS PO recruitment exam and got selected as an Asst. Manager (Probationary Officer) at Indian Bank, Nizamabad. Upon getting a Group-B officer position through SSC-CGL, she has resigned for the Asst. Manager Position at Indian Bank after 20 months of service. Currently, she is working in Group-B cadre at the Directorate of Enforcement, Bengaluru as an Asst. Enforcement Officer for enforcing economic laws and fighting economic crime in the country.

K Naga Bhavya Jyothi

Branch: ECE

Company working: Technical Resource Member of Solar Decathlon India and Solar Decathlon US (National and International competitions organized by the US Dept of Energy). Also pursuing a Ph.D. at IIT Bombay.

Notable achievements:

- ❖ Led the 50+ student team with 8 faculty advisors that bagged 2nd Prize in Attached Housing Division and Best Graphic Design Award worldwide | International Competition Solar Decathlon US, DOE 2021
- ❖ One of the leads of the 70+ student team that won the "Best participation award" in Solar Decathlon US Building House Challenge | International Competition | Solar Decathlon China 2018

- ❖ Excellence in Teaching Assistantship | VLSI Design Course
- ❖ IIT Bombay "Institute Technical Organisational Award" for representing IIT Bombay in an international competition
- ❖ Founder of COVID-19 PPE Tracker team that connected PPE donors with hospitals during the COVID 1st wave
- ❖ Nominated for Best Poster Award at 46th IEEE, Photovoltaics Specialist Conference, US, 2019
- ❖ Gold medal in UG Vs PG department-level badminton competition
- ❖ Bronze medal in inter-department badminton competition

Success Story:

K Naga Bhavya Jyothi, of ECE department, GNITS, had graduated in 2016. During her 3rd year, she decided to prepare for GATE-2016 exam and gave the exam in her 4th year. She got the 943rd rank in her first attempt, thanks to her strategic plan of how to attempt a tough paper. This rank led to hopes of getting into the newer IITs and the old NITs. However, one of the HODs of GNITS advised her to take the exam that would be conducted by IITs during admissions for students closer to the 1000th rank so that she could get into one of the top IITs. She started attending the written exams and interviews in all the IITs. Despite the rejections she faced from most of the IITs, she got into one of the top IITs in India i.e., IIT Bombay. After stepping into IITB, she realised that there was a lot more for her to explore.

With the communication skills she developed in GNITS when she was her class representative, she landed in the publicity team of "Team SHUNYA, IIT Bombay" where she was participating in international competitions to design and build solar houses. Later, she became the lead for the electrical subsystem of the team and then rose to deputy project manager for the whole team consisting of 70+ interdisciplinary students and 8 faculty advisors. In 2018, the team received "Best Participation Award" in Solar Decathlon China conducted by US Department of Energy for building a modular solar house in 15 days in China. She then became the team lead for the next team participating in Solar Decathlon US Design Challenge, in 2021. Parallely, she got selected to present her M.Tech project work in one of the prestigious conferences in solar field, Photovoltaics Specialist Conference in 2019 US. She was nominated for the "Best Poster Award" after which she decided to pursue her PhD in IIT Bombay. She is currently working at the National Centre for Photovoltaic Research and Education, IIT Bombay funded by MNRE, Govt of India to build an instrument for reliability test and also developing a standard for vehicle integrated photovoltaics.

She was honored with "Institute Technical Organizational Award" for her contribution in several technical activities as a representative of IIT Bombay in an international level. The team she was leading for US Design Challenge bagged the 2nd position in attached housing division worldwide. This led to her receiving an offer from Director of Solar Decathlon India to be the technical resource group member and mentor the teams participating in the competition. Currently, she is mentoring three national teams participating in Solar Decathlon India Design Challenge 2023. She is also mentoring an international team participating in Solar Decathlon US Build Challenge 2023. Along with this, she is guiding the Team SHUNYA, IIT Bombay team as an alumnus participating in Solar Decathlon US Build Challenge 2023. She also founded COVID-19 PPE Tracker Team during COVID-19 crisis to connect the PPE donors with hospitals. With four international conferences and journals submitted for review, she looks forward to explore her field as there is no end to research.

**Sura Shivani**

Branch: ECE

Company working: Intel India Pvt Ltd

Notable Achievement: AIR 1331 GATE rank

Coming from a family with a medical background and limited access to the internet led to minimal knowledge on engineering. But, her immense love for mathematics made her choose M.P.C in intermediate and eventually engineering as a career. From day 1, she was firm on becoming an Electronics Engineer and she has stayed true to it as she is now a **VLSI Design Engineer in Intel India Pvt Ltd**.

She got good guidance from her professors at GNITS. She got placed in multiple software companies, one of which she joined. However, she left the company within a year to write the GATE exam and pursue her masters in VLSI. She qualified with AIR 1331 GATE rank and joined NIT CALICUT to do her masters in VLSI.

She currently works at her dream company and stays in Bangalore with their partner and their 1 year old.

Annapurna Alladi

Branch : ECE

Company Working: KPMG

(Partner, Digital Trust)

She did her MBA in IIT-Delhi. She had worked with State Bank of India briefly and then joined KPMG in 2007. Since then she had the opportunity to provide Technology consulting with a focus on technology risk related services. She worked across sectors including – Technology, BFSI, Life Sciences and Consumer markets. She also has the opportunity to travel extensively and has worked in UK, US, middle east and South Africa. Her success lies in building strong client relationships and leading large teams. She has been a part of subsequently leading the Technology risk team in KPMG Hyderabad. This year has been even more special as she completed 15 years with the firm and also became a Partner with the firm.

Abhinaya Katta

Branch: ECE

Company working: AMD

Notable achievement - <https://patents.justia.com/inventor/abhinayakatta>

Patent on Programmable Clock Monitor

She was an ECE graduate who always dreamt of pursuing a career in Electronics rather than switching to a software career. She got placed in **Powerwave Technologies** in her Final year. She completed her **ME** from **BITS-Hyderabad** in Embedded Systems. She then moved to Xilinx, one of the top industries of FPGA, which has been recently acquired by AMD, another legend in processors. She is presently working as a **Senior Silicon Design Engineer 2** at AMD. She filed a **patent** for her work in Clocking in FPGA and it was approved recently. She is an ECE BOS member in GNITS for the past couple of years.

P. Nikhila Putcha

Batch: ECE

Company: Co-founder - MoneyPlanned

Notable Achievements:

1. Co-founded and successfully ran an INR 50 Cr company MoneyPlanned, a Fintech startup that is building a highly-scalable platform for automated financial planning. MoneyPlanned is a company that is backed by marquee investors like Inflection Point Ventures (first investors in BharatPe), Expert Dojo VC (Silicon valley based Accelerator), Dot Capital (Newyork-based Venture Studio), Sameer Khan (Executive Director at DBS Bank, Singapore) and several other seasoned angel investors from across the world. Money Planned raised \$500,000 in seed funding so far.

2. MoneyPlanned was chosen as the best platform globally by Wix Velo for web design in 2020 September
3. MoneyPlanned has more than 200,000 users across India as of the date and our users have planned and tracked financial goals worth INR 6,500 Crores on our platform. We have more than 5,000 paying users and are growing 50% MoM.
4. The link to Appstore and Playstore are on the website: <https://www.moneyplanned.com/>
5. <https://www.entrepreneur.com/en-in/news-and-trends/moneyplanned-raises-over-inr-25-crore-seed-fund/435564>
6. Indian Patents Office recently granted a patent authored and owned by Nikhila titled "System and method to assist users in financial planning" in July 2022.
7. Nikhila is the recipient of the 40Under40 Entrepreneurs award conferred by Observe Now media and Dell Technologies. The award was facilitated by Maneka Gandhi, Honorable MP.
8. Received "Entrepreneurial Spirit Award" by L&D Summit in Feb 2022 conferred by Harvard Professor Asis Sen.
9. 2nd Position Globally in InDesign Conquest - Velo by Wix for MoneyPlanned among 100,000 websites around the world. Received a \$10k cash prize as an award.

Success Story:

Nikhila is an entrepreneur and technologist who has co-founded MoneyPlanned, an INR 50-Cr deep-tech startup in the personal finance space which is funded by marquee investors like Inflection Point Ventures, Expert Dojo (California), and Dot Capital (New York). She has a versatile set of skills in Blockchain-AI development, product, and growth leadership.

Her patent on Web3-based Financial Planning was granted by the Indian Patents Office in July 2022. She is also part of the GrowthX community which is an exclusive forum for exceptional growth leaders and angel investors listed by Forbes. She was featured by several top publications like Entrepreneur, LiveMint, and Your Story and received several awards. A notable few include the Observe Now & Dell Technologies 40 Under 40 presented by Maneka Gandhi (Honorable MP) and Entrepreneurial Spirit Award by L&D Symposium presented by Asish Sen (Professor at Harvard).

Gaithri Thakur
Branch: ECE
Company working:
Wellsfargo India solutions
(solutions Engineer)

Notable achievements: Jntu University topper, gold medalist, 2nd rank in university final exams 2000-2004 batch, GNITS college topper for 2004 batch, ECE branch topper 2004, M.Tech computer science, 18 years of software engineer experience, currently working as Solutions Engineer in Wellsfargo. Received prestigious Pratibha scholarship from the state government, received the Wellsfargo conclave award 2021.

Bireddy Ramya
Branch : ECE
Designation: Scientist / Engineer in
Physical Research Laboratory

GNITS not only provided her with ample engineering skills but also moral values. Owing to the guidance from the professors, she was preparing for the GATE entrance exam, aiming to join IITs. However, she could not get that in her 3rd year, and did not have good IITs in her required stream in her final year. Then, she decided to sit down and prepare for GATE after her final year, as she realized that much of her time in college was spent on subjects and labs.

She joined as a Scientist/Engineer in Physical Research Laboratory in 2013. She was assigned the responsibility of operation and part of the instrument development team of the newly installed India's largest solar telescope, named Multi Application Solar Telescope (MAST), situated in lake Fateh Sagar, Udaipur. Her team got awarded with "ISRO Team Excellence Award" in the year 2017, for the project MAST. MAST telescope is a 50 cm solar telescope that gives high-resolution images of the sun, and also gives the doppler velocities and magnetic field of the sun.

She's also working with a group in the international project, Global Oscillation Network Group, where six similar instruments are installed around the world and one of them is at Udaipur, which studies Helioseismology on the sun. She's also working in the back-end instrument team of a newly proposed 2 m class solar telescope named "National Large Solar Telescope (NLST)".

Her team develops instruments to study the sun and different processes like solar flares and coronal mass ejections, which also impact different planets and satellites. In 2019, she completed her M. Tech in Embedded Systems from Birla Institute of Technology and Science, Pilani, stood in the Top10 and got the opportunity to attend the convocation in BITS, Goa campus. Currently, she is planning to continue her research in Astronomy and Astrophysics. She got opportunities to publish 5 papers in international journals and 2 technical reports, and to guide 6 engineering students.

Apart from these, she practices yoga and participates in many sports and tournaments in the department of space, and won many prizes. She spends her time in social activities, being part of NGOs.

Deepthi Vajpayee

Branch: ECE

ACADEMIC QUALIFICATIONS : B.Tech.

Deepthi Vajpayee is a Senior News Presenter and Anchor of TV9, also the celebrity anchor of the TV news media in Andhra Pradesh. She has an experience of more than 18 years in the electronic media and has been with TV9 ever since its inception. Though she is an Engineering graduate, her flair for anchoring has driven her into this profession and ever since she never looked back. Apart from presenting the regular News bulletins, she has an expertise in handling current issues ranging from political, social, lifestyle, sports, technology to entertainment issues, wherein she excelled as an anchor.

The command she has on Telugu language, has made her an ace anchor in no time. All her programs, bulletins and shows prove that she has an edge over the content as well as the presentation. In no time, she has won many best awards and rewards. She was bestowed upon with the prestigious NANDI AWARDS from the Government of Andhra Pradesh thrice in 2006, 2008 and 2015. Her vibrant attitude, unique disposition and electrifying presence on screen made her the most sought after news anchor within a very short span.

Deepthi Vajpayee's 18+ years of experience in the TV news media speaks volumes of her undaunted involvement in every presentation and her versatility in each of them. Whether it is an entertainment show or a Human interest issue, a social issue of concern or a serious presentation, she excels in every show and always has enhanced the value of the program with her scintillating and dynamic presence.

 - 33) BIG 92.7 FM - Women's Day Award (2016)
 - 34) Telugu TV Writers' Association - BulliTeraMahilaSiromaniPuraskaram (2016)
- Deepthi Vajpey has been unanimously elected as the PRESIDENT of Sarojini Naidu Mahila Branch (Hyderabad) of the prestigious nationalservice organization-BHARATA VIKAS PARISHAD for the year 2022-23

Haripriya Malladi

It's been really a wonderful journey from the days in GNITS to the present. Currently I am working as Application Development Manager in the Accenture Technology Group for the ServiceNow Delivery Factory. My 15 years of experience includes Business Operation Process Automation, IT Service Management, Enterprise Monitoring, Service Oriented Architecture and Application Development. I also specialize in Design Architecting ITSM and ServiceNow tools as a SME (Subject Matter expert), Lead Technical Developer and am managing development teams in the sphere of IT Service Excellence.

Playing multiple games like Volleyball, Basketball, Throwball, Badminton all through the 4 years of B.Tech. is a cherished experience. It's a matter of pride for me to get selected and lead the JNTU University Captain for Volleyball and I was the only player selected from GNITS into University team. Happy to say that now I am a BoS member for Mathematics, Management Studies, and English at GNITS.

**Naveena Ghanate**

I am Naveena Ghanate (2006-2010) was placed through campus placement in GNITS and joined as BTA in Deloitte. After working for nearly 6 years, I left Deloitte as Senior Consultant in the United States. The year 2017 was a dream year for me to mention that I joined Deccan Chronicle to pursue my passion as a Journalist. And now started with covering Global Entrepreneur Summit where Ivanka Trump visited Hyderabad, also joined The Daily Pioneer in 2019. And from the role of correspondent to Bureau Chief. Now this is a record in itself in newspapers for a reporter to become bureau chief with a small experience. In my current role, I am also grooming young journalists apart from reporting.

During 2022 I was recognised by Telangana government for my whole contribution to journalism on Women's day and felicitated by Ministers K T Rama Rao, Sabitha Indra Reddy and Satyavati Rathod. In 2022, I met Amit Shah, covered Padayathras of Rahul Gandhi, Bandi Sanjay and interviewed various politicians and IAS officers. Not only through my work at Pioneer, from my social media, I have become the primary source of news for people and my reporting includes politics, people's issues, health, IT, Industries and CMO.

Ancitta Joseph

I am Ancitta Joseph currently working as Team Lead at Accenture, Bangalore. Every institute teaches us to always keep learning and growing our knowledge. Big thanks to GNITS for the strong foundation that made me capable of achieving anything I am. Learning and growing have been a part of my life but the guidance and support we received here will always guide us in making all the right decisions in life and excelling wherever we go.

Thank you so much for everything, all the teaching, and non-teaching staff and we will always keep striving to shine bright for our College.

Divya Billa

Myself Divya Billa, a B.Tech Graduate from G.Narayanaamma Institute of Technology and Sciences(Affiliated to JNTU), Hyderabad. Also I am an International certified PG Diploma holder for Nursery & Kindergarten. I have taken up many responsibilities right from my childhood which includes a beautiful daughter to my parents, a friendly wife to my better half, a caring mother to my daughter, a wonderful granddaughter, a lovely friend, a supporting colleague. From the above roles, I have learnt kindness, being honest, caring, spreading love, empathy and many more qualities which shaped me the woman I am today.

Apart from these roles, I have also taken up a few other responsibilities for my professional growth which includes 10 Years of experience in HR (Human Resources) working with Top notch companies like Naukri.com, Pyramid Consultants, Kelly Services, Manpower Consultants, Eunimart etc. Currently, working with Birla Open minds as a Teacher, Head of Assembly committee, Discipline committee, Events committee etc. Also working as an Associate Vice President of AASRAA, a NGO which fights for consumer rights (for Government Recognition and Sports portfolio). And I worked with Telangana People's Assembly (TPA) during Covid 19 Lockdown Relief Helpline (Telangana & Andhra) for helping migrant workers. Have worked as a

volunteered during pandemic and got a recognition for the same from Telangana Govt (T - SIG Covid 19 Warrior Recognition). It's a pleasure to say that I had also conducted free art and craft online sessions to children of different places during the pandemic to remove their boredom during the 1st wave.

Mostly I engage myself by doing art and craft, origami, all types of paintings and drawing, playing carroms and badminton. So here I stand with my head up high to face the world with a smile.

Jyothsna Kameri

Myself Jyothsna Kameri.

I am based out of Telangana State from a small village called Talamadri. My father is a farmer and mother worked in the fields. We are from a lower middle-class background. We have faced a lot of struggles financially. My father being a farmer we used to work in the fields from my childhood. I started my education in my village in a government school till 5th class and for 6th class I got admission into a Social Welfare Residential School. From 6th to intermediate I have studied in a government residential hostel far away from my parents.

I have got admission into GNITS for Engineering in Computer Science. Being a Telugu medium student till 12th. Initially it was very tough for me to understand the subjects and very difficult to communicate as well. But as time passed, I learned it with determination and hard work. And hardworking is one of my powerful strengths. That's why I am here where I am today. In the last year of engineering, I got placed in one of the MNC Syntel in the campus placements offered by GNITS. That was a big day for me and my family. Then started working in the IT industry in January 2012. And also I worked in 5 companies so far and currently working as a Java Tech lead in TCS. I am Very grateful for the education provided by GNITS and campus placements.

Sony Salavadi

I am Sony Salavadi,

I have graduated from GNITS in the year 2018.

I am currently Pan India manager at BookMyStall.in for over 5 years and pursuing my higher education in Computer Science at JNTUH. GNITS has paved the path for many steps in my professional life. My one big achievement includes signing an MoU with BookMyStall and having them work with us on multiple technologies. My ambition in life is being a part of global business within the next 5 years.

**Bhavana Pulluru**

I am Bhavana Pulluru ..Batch:2012-16,

A part of my history and a slice of my present life. Hello, all!

From Day 1 in GNITS, every situation I've faced has transformed me into a more thoughtful and responsible person. I was the Class Representative since 1st year for all 4 years of Engineering which has made me alert and has taught me how to tackle the toughest of situations in a better way. Personality development is a priority in my life, and I am glad that I have been a member of persona for this reason. My best moment was when I was selected as PUBLIC RELATION OFFICER from 2014-2015, where I could help people recognize themselves which gave me immense satisfaction. I have been elected as the ISTE chapter TREASURER in 2014-2015.

Organizing various events in our college boosted my self-confidence and I have received the Student membership certification from the Lead India national club.

The CSE department with its regular technical events made me strong with technical skills which helped me when I presented a paper on "JVM based cloud computing for android" at IGNIUM 2014, designed a static website titled "Scripting Languages" and designed, developed an AKSHARAABHYAAS- an android App under CSE Mini project aimed for children with autism. I was awarded the 1st prize in TECHNOCARNIVAL 2015- 4th National level student tech-cultural fest.

The faculty at the college was encouraging us all through the time to go through something new that would help us stand distinct from the rest of the crowd, a heart whelming thanks to all the teachers. The superb part of my college was my dearest buddies, without whom the college life wouldn't have been so smooth. I thank them for being some of the best companions of my life.

Currently, I am a part of Optum Hyderabad working as a Product Owner (Sr Business Systems Analyst) leading 4 scrum teams, and enthusiastically developing an Enterprise Ecommerce Application for Content Solutions, and awesome alumni VisaInc Technology and Services, Bangalore. All the knowledge I gained at college has helped me face the world of 'IT' with good enough exposure to tackle my day-to-day tasks. There is a lot more one comes to learn only when one becomes part of the technical and modern ever-changing

world. My experience at college helped me get adapted to the changing scenario of the society around me. Though I am from an explicit Girl's college, I never faced any hurdle facing social society or the tech world. I am very happy in fact to be a part of such a college.

My family and my beautiful lovely daughter, my Alma mater, and all my mentors have always been supportive throughout my life. Although I aspire to be an IAS officer with the intention to serve my nation, right now I am dreaming about being an entrepreneur, and creating employment opportunities for intelligent people with innovative thoughts.

I would like to advise all my juniors to work on their tasks in such a way that they leave an impression behind them. Also, I would urge people to step forward and assist others when they need help because the good you do is never left unacknowledged. Be an all-rounder and learn everything possible. I believe that a rupee spent unnecessarily may be earned back but even a second of time if underutilized cannot be regained. So do spend your time wisely folks. No worries, life is always the way you paint it, just let's try making it as beautiful as possible. Keep smiling forever, nothing in life is so great that it can snatch your happiness from you.

Mounica Devabhaktuni

I am Mounica Devabhaktuni

Firstly, I would like to convey my heartfelt congratulations to GNITS on completing 25 years.

Finding the right path to success at the right time is really important. When I first entered GNITS I was quite anxious about my future. Over the years I was overwhelmed with the various opportunities provided by college for our personal and academic development which made me confident. Thanks to our faculty for helping us in building our career. They were very knowledgeable and supportive throughout our journey. Our faculty played a major role in enhancing our technical and leadership skills. College has taught me things far beyond books and helped me broaden my horizon. Special thanks to Kalyani ma'am for giving me an opportunity to work on a research based project which would act as an assistance for specially-abled children. Through this project I got a lot of exposure not just on the technologies to implement the solution but also got a chance to go out of my comfort zone and interact with various people.

Post B.Tech. I have chosen to build a career in IT and currently working as Senior Associate Software Engineer at JP Morgan Chase. I'll always be looking forward to giving back to my college anytime.

Ashwini

Ashwini 2012: I am Ashwini, which means a beautiful STAR in the sky. I wanted to Shine and Excel in whichever I entered. I am proud to say that I have studied at GNITS and gained a lot. Let me go to flashback when I was in my 10th class

I am from a very poor family background where there was no power during my complete 10th class. And my 10th studies were done under the candle lights and rent of my house was just 300 rupees at that time because of our financial crises. We adjusted for 2 years as it was my relative's house so that we can pay rent later.

My paternal & maternal relatives advised me to stop my studies and get married. But my dad is my Hero, he struggled a lot, and instead of spending money on my elder brother's studies, he concentrated on me more. My father never felt the girl was a burden to the family.

Some relatives said Why do girls need to study? Is that just because girls leave home and they don't pay back? In that Govt school, I topped with 521 marks in my District in the 10th grade (Telugu medium) from ZPHS, Patancheru, and I even received the "BEST STUDENT" of the Year Award. And it was indeed a surprise for everyone who didn't believe in me. And it was a proud moment when my achievement was published in the Eenadu newspaper.

And I even got a free seat in Intermediate at Narayana Jr college (English medium) during that time everyone told me that I would fail because my language of study is not English. Little thing to be mentioned is a **Pocket Dictionary** which played a key role in understanding the language. And I secured 92.1% in my Intermediate along with a good rank in EAMCET and secured a free seat in the prestigious college G.Narayanamma Institute of Technology and Science, through which I was able to meet my inspiration and my role model

Dr.APJ Abdul Kalam during Swetha volunteering. Just after 4 years, I was with 2 jobs in my hands. Now I am privileged to say that I am a multi-talented woman. I am a software Engineer at TCS and I am happy to say that I received several awards like CLAP AWARD 2022, the BEST TEAM AWARD and STAR PERFORMER AWARD from

TCS. Also a YouTuber and Anchor (Saree anchor/model for Mugdha, JS BABU silks & Roop Nikhar and have done a few programs on Mana voice and other platforms). I am an Interior Designer, Best out of waste Craft maker, Passionate participant in Tv shows, Online Home Tutor, Special non-veg cook, and Fashion designer (I got special appreciation from Ashu

Reddy for my own designed costume), Digital Marketer/Promoter and Influencer.

I was very interested in participating in TV shows. I have that passion and desire but there was no help. I approached many but no one helped me. But now, I am in a position to refer ladies to Women's shows and all ETV cooking programs and help those who have desires like me and can change their lives. I am a "Changemaker". I participated in many TV shows like Star Mahila (Title Winner), Happy days, Cash, Lucky chance, and cooking programs like Telugu Ruchi, Indian Kitchen, and Healthy Tasty programs that received good applause for my talents.

I proudly say that I was called Mrs.Change Maker by NAARISENA 2022, Mrs. Intelligence 2021 from TMN (Telugu Moms network)

Apart from them, I also do social service for Amma Odi Orphanage. And I helped Mother Teresa Old-age Home to sell their organic vegetables on different platforms by using my youtube channel. I also help small start-up businesses through my HaviKriti Creations Channel like Marketing their sarees, jewelry, accessories, etc.

My Mission: My name is Ashwini (Star) I want to shine in all fields

"IN MY DICTIONARY There is no word of IMPOSSIBLE because I will make it IM POSSIBLE " with my hard work and dedication.

Akanksha Srikanth

My Journey to Becoming a Delegate for a Science Exchange Program in Japan:

I studied in Kendriya Vidyalaya No 1, Golconda from 1st to 12th grade. Kendriya Vidyalaya gives its students many outgoing opportunities. One such thing is to be a delegate for a cultural or Science exchange program in Japan based on 10th-grade scores and overall skills. In 12th grade, I was selected as one among 75 students from India to go to Japan for a week for the Sakura Science Exchange Program. Five countries met there, and those were among my best days.

The journey to get there was not easy. Being a CBSE student is hard, but I had my eyes on the prize, and not one day goes by when I don't think about my week in Tokyo. The key takeaway from this is hope. Sure, working hard and being true to oneself and those around one, be it one's family, teachers or peers, is important. But hope is something one should never give up. I stayed in school instead of attending a prep junior college in 11th and 12th grade because my hope of going to Japan never died, and my dreams came true!

Never lose hope, work hard, and all your dreams will come true.

**Harshitha Peddapalli**

I am a naughty backbencher who transformed into a studious determined achiever. Here it goes...during 7th class, after a complaint from the principal that I was not studying well to my parents, I came into the top 5 of the class from just passing marks understanding the pain of my father who is a district topper in his 10th class. My parents never scolded me, they only expressed their pain. When my father was worrying my mother told him that I would study well and he need not worry. Trust it, their encouragement became my strength and confidence to improve my marks in studies or achieve goals.

I secured 506/600 marks in 10th which became talk of town in our colony. I completed +2 in Nalanda Vijayawada securing 83%. Out of homesickness my friends were dropping out of college, with my parents' letters as encouragement I studied with determination, joined the best engineering college GNITS one of top 10 colleges at Hyderabad during 2004-08. From day 1 we made my goal to crack first campus placement, with good teachers and friends I cracked the interview of Wipro (first company to the college in year 2007). I can't express in words how happy I was when I achieved my first job offer during my 3rd year. I made a lot of efforts from 1st year, paper presentations, projects, exams interview preparation, smart work with positive approach. I joined Wipro post graduation, continuing my career without looking back.

My message is just never lose confidence anytime, just be yourself, trust self, give efforts, and accept. In spite of all challenges in life, if we are confident we can achieve anything, Never get influenced by negativity of world, always keep yourself towards positivity like a sunflower always looking at the Sun. There is no concept like toppers or dull students, everything depends on perspective. If you think you are a genius you will become one with right efforts and thoughts. It's just our way of thinking, anyone can become a topper. It's just that we need to trust ourselves, be confident, and work smart, Success just follows us. Even right now I am with the same confidence as I was in my 7th class. That's the power of positivity and confidence. I wish everyone should think like this and succeed in their life. Don't forget to be awesome and happy.

Rupamathi Jaddivada
Boston, Massachusetts, USA
rjaddiva@mit.edu

I am currently the Director of innovation and an AI research scientist with an energy-based startup company SmartGridz based in Boston, MA. I completed my Ph.D. under the guidance of Prof. Marija Ilic in Electrical Engineering and Computer Science, with a minor in machine learning, at MIT. As a member of Electric Energy and Systems Group (EESG) and Laboratory for Information and Decision Systems (LIDS) at MIT, I have had the privilege of working with some of the most brilliant minds in the world.

My research focus is on the intersection of engineering, computer science, and public policy to develop AI-enabled physics-backed solutions that could expedite large-scale adoption of green energy. I am interested in developing simple yet sufficiently rich metamodels based on the underlying physics to support the digital transformation of legacy power grids that can operate reliably and efficiently all the while supporting cost-effective integration of distributed energy resources.

Prior to MIT, I received my Master's at Carnegie Mellon University and was the recipient of the prestigious Carnegie Institute of Technology Dean's fellowship. Having received my undergraduate degree from GNITS, Hyderabad, a women-only university, I have always been committed to women's empowerment. Over the years, I have mentored a wonderful group of passionate women to pursue research in energy and guided them through their careers.

I welcome opportunities to speak on my past and current research and get feedback.

Our universe is a sea of energy - free, clean energy. It is all out there waiting for us to set sail upon it. - Robert Adams

Education

Massachusetts Institute of Technology, Cambridge, USA 2016-2020

Ph.D., Electrical Engineering and Computer Science (Minor in Machine Learning)

GPA: 4.0/4.0 Dissertation Title: A unified modeling for control of reactive power dynamics in electrical energy systems Committee: Dr. Marija Ilic (Chair), Dr. Munther A. Dahleh, and Dr. James Kirtley Jr.

Carnegie Mellon University, Pittsburgh, USA 2015-2016

Master of Science, Electrical and Computer Engineering GPA: 3.96/4.0

Jawaharlal Nehru Technological University, Hyderabad, India 2010-2014

Bachelor of Technology, Dept. of Electrical and Electronic Engineering

Achievements:

- Ilic, M., Jaddivada, R., Exergy/Energy Dynamics-Based Integrative Modeling And Control Method For Difficult Electric Aircraft Missions, Provisional Patent Application No. 62/730203, Filed on September 12, 2018
- Ilic, M. and Jaddivada, R., Massachusetts Institute of Technology, 2019. Methods and systems for secure scheduling and dispatching synthetic regulation reserve from distributed energy resources. U.S. Patent Application 16/206,009.
- Ilic, M., Miao, X. and Jaddivada, R., Massachusetts Institute of Technology, 2018. Plug-And-Play Reconfigurable Electric Power Microgrids. U.S. Patent Application 15/965,823.

Professional Activities

- Membership: IAEE, IEEPES, SIAM, USAEE
- Reviewer: IEEE Transactions on Power Systems, IET Generation, Transmission & Distribution, International
- Journal of Electrical Power and Energy Systems, Elsevier Electric Power Systems Research Journal, Hindawi
- Served LID Mentoring committee and as a LIDS Tea Talk organizer from September 2018-May 2019
- Served as Group Secretary, EESG@MIT from September 2016-August 2019
- Student representative, Indian Society for Technical Education (ISTE) student chapter, GNITS, Hyderabad, India for the academic year 2012-13.

Geethu

This is Geethu, studied Electrical Engineering, and passed out in 2013 with 76%. I am currently working at Epam Systems as a Project Management Team member. I received great recognition in my company almost instantly and received a 'Star Award' for my work.

I recommend my juniors to work hard and do numerous industrial visits which will build their resume from their 3rd year onwards. In addition to doing various internships, they should also improve their communication skills as it is the most important aspect of a job.

**Niroopa**

This is Niroopa, studied Electrical Engineering and passed out in 2013 with 77.9%. I am currently working as an Assistant Engineer in TSGENCO.

I suggest my juniors concentrate on programming languages in order to get placed in the best companies not to lose hope anytime, be confident.

Pranavi

This is Pranavi, studied Electrical Engineering, passed out 2017 with 83%. Currently I am working in "Accenture" as a Team lead of Application Development, which is a Telecommunication project.

I have won 'Ace Excellence Award, Apex Award and Music related awards. I have received 'German Language Certificate'. I have done my Diploma in Carnatic Music.

My suggestion to everyone is that younger generation should learn Business and Communication skills along with Technical skills. As there are only 60% Technical skills, so everyone should enhance further in other skills like Presentation skills etc. So, that you can have a bright future.

**Linsifa**

This is Linsifa, studied Electrical Engineering, passed out 2013 with 78.77%. Currently I am working at "Accenture". I am the Team Lead of my team. Within a short period of time i.e., less than 5 years I have become Team Lead. It made me to realize that "Hardwork never Fails".

Finally I want to suggest you that, along with Academics also actively participate in Extracurricular Activities. It makes you to learn new things and develop extra Skills. Always be ready to face any situation and grab any opportunity that the Company offers you. Improve your Communication and Technical Skills.

Pratyusha Chinnamsetti

This is **Pratyusha Chinnamsetti (13251A0270)**, from EEE 2013 – 2017 batch. I am working at **Accenture** as Application Development Senior Analyst. Studying in GNITS was my mother's dream during my intermediate education and fortunately my eamcet rank put me under EEE dept and I always feel blessed studying at GNITS.

My Sincere Thanks to **ALL** the faculty members, who provided me a very good path for my success till today. I feel responsible working as a Class Representative (2013-17). Right from my childhood I am very much passionate about Making Crafts and Paintings, and I have participated in all the competitions held at GNITS and I always believe in "Opportunities don't happen you create them, and every opportunity needs a Preparation". I have also participated in many technical contests and CRT trainings to make myself Self-Disciplined and Confident which really helped me crack two interviews for both Accenture and Infosys.

I have also received many rewards in my career, received promotions and awards like H&PS - Zenith Award and Top Contributor Award. I have also participated in many PPA activities as a PPA member, and I was also a member of Corporate Social Responsibility. Self-belief and hard work will always earn you success. I like learning new skills and practically working on new technologies which will really helps us in growing better in our career.

Life is not smooth for all of anyone of us without facing any difficulties. It is always challenging at every stage of our lives and we women are always strong in accepting those challenges. I always believe that "Difficulties in your life do not come to destroy you but to help you realize your hidden potential and power, let difficulties know that you too are difficult" – Dr. A. P.J. Abdul Kalam. We should be always thankful to our parents, and I always feel blessed and Proud to be a happy Daughter, Student, Employee, Wife and Mother

ACHIEVEMENTS AT GNITS

CLASS REPRESENTATIVE from 2013 – 2017.

- Stood **FIRST** in designing a logo for TEJASS and in presenting a documentary on GNITS in 2016.
- Stood **SECOND** in Poster Presentation 'Smart Grid', in IGNIUM-2K16, conducted at GNITS, on 17th and 18th March 2016.

- Stood SECOND in Paper Presentation under IEEE, conducted by GNITS, in 2016.
- Stood SECOND in Poster Presentation in VIVEKOTSAV conducted by VandeMataram Youth Front in 2016.
- Stood SECOND in Paper Presentation in MEDHANVESH-2K16, conducted by the Dept. of EEE, BVRIT.
- Stood SECOND in Ornithopter Designing in Interdisciplinary Workshop on Design and Development of Ornithopter held on 6th August 2014.
- Stood FIRST in Hardware Contest in IGNIUM-2K15, A National Level Technical Symposium conducted by GNITS, on 27th & 28th February 2015.
- Stood FIRST in the event TECHNOCRITY in TECHSONANCE-2015, A National Level Technical Symposium conducted by the Dept. of Electrical Engineering, University College of Engineering (A), Osmania University, in March 2015.
- Awarded Rs.15000/- every year from Mylan Employees Welfare Association (MEWA), my father's employer, since 10th Class onwards.

RizwanaAnjumSyed
09251A0211
Rizuanjum11@gmail.com

This is **Rizwana Anjum**, from **EEE 2009-2013 batch**. I am working at **Deloitte** as a Technical Delivery Manager. Studying in GNITS was actually my parents' choice but I am grateful for all things it gave me, for one such thing read below:

Due to my awesome supportive friends and 1 week of solving aptitude under the class notebooks, had cracked the first interview itself (1 among 3 from whole EEE). But being from a conservative family, I had not told my parents that I was attending campus placements. So definitely journey from informing at home till now was a roller coaster. Initially it was a bit challenging but my zeal to learn things and proving myself at every opportunity had made me received number of rewards and also be into US 3 times. And it was not definitely easy owing to many things, however whether it is career or anything, I believe we can do everything and anything we want to.

So, ladies just believe in yourself and move forward!

Sai Harshitha Dumpeti

This is Sai Harshitha, studied Electrical Engineering passed out in 2021, currently working as a Quality Engineer in a product-based company 'ServiceNow'. I have never had any clue about working as a software engineer, have been good in my academics but didn't concentrate on planning on further steps towards my career. Slowly, reached 3-2 preparing for GATE now will be a foolish decision. Right ahead are campus

placements people will knock on your door. I am happy to share my efforts here on making this happen in such a short time.

Hardly, I have anything to put on my resume. Made up everything what all I required at my home online. Aptitude at the fastest mode, applied for internships, received all the components on courier and had made the prototype. I have given mock interviews to another college alumni student. Solved several problems on competitive platforms. I was on my laptop all day solving at least 20-25 varieties of problems a day for 1 and half months.

I made myself strong in all the aspects from basic communication, personality to all the technical strength. When it comes to a product-based company, it's only your ability to build the logic and solve the problem is what all matters. It's an effort of 3 months with some planning. Straight away got hired in my first attempt in the first company with 21LPA. The funniest part here was that I told my parents that I am preparing for GATE and it's a sudden treat for them as well. Strongly follow to never reveal your further steps, let there sult make noise.

I am performing well everyday exploring new things with a great team. Successfully completed a year in my company and have received the Llama Award for my contributions. I took land on my own, which is my first big initiative again financially. I spend my life everyday with lots of learning and travelling to new places and many more to go.

Sai Veena

This is Sai Veena, studied Electrical Engineering, passed out 2012 with 88.29%. Currently I am working in an Organization: "U R Rao Satellite Center, ISRO, Bangalore". In our organization, we do work on making satellites. I am into production part of relazing DC-DC converters which are essential in spacecraft power system configuration. We do also work on new technologies in improving DC-DC converters designing aspects and also testing of the same. Currently, I am working for Aditya-L1 and NISAR projects. My upcoming project is ANVESHA satellite.

I was placed in Capgemini during campus placements. Then I had worked there for 8 months before joining for M.Tech. (2014-2016) in NIT Calicut.

**Srikoumudhi Yumbar**

Batch: 2018-22 EEE

Company: Telstra -

Associate software engineer

Notable Achievements:

Passed out with a CGPA of 9.09

Won first prize in paper presentation and in mini project under Mrs. Sujatha

I always thought EEE was the hardest among all the branches and I would score a bare minimum to get my degree. Then I met this wonderful faculty and supportive management who made it possible for me to manage both my core subjects and my preparation for an IT career. Though, we lost most of our graduation years to covid, we managed to go on an Industrial tour, never missed to celebrate college parties nor had less fun with friends. This college not only shaped my career but also helped in my character growth. I would proudly say I am an alumna to GNITS which I now consider my second home.

Advice to juniors:

I think I am not yet ready to give a career advice to them, but I can surely say that student life is the best. So, make most of it, be it studies or fun. College life is an important phase to make correct decisions which would build someone's career and character. So, try everything, make mistakes and then learn from those.

Shreya Madari

This is Shreya, studied Electrical Engineering, passed out 2012 with CGPA of 7.928. Currently I am working in 'Borri Electrical'. It is an Electrical Manufacture Company and we work on fibering. I am a Senior Tendering Employee at my work place.

Let me suggest you that those who want to get into Electrical Companies choose the correct path and never get distracted from your goals.

Sushmitha

This is Sushmitha, studied Electrical Engineering passed out 2014 with 70% .
Currently, I am working as Freelance Music Educator.

CO CURRICULAR and EXTRACURRICULAR ACTIVITIES:

- Got chance to sing in cultural performance presented before NAAC peer team visit in B.TECH college.
- Participated in TECHNICAL QUIZ in ELECTRICUS- 13 FEST
- Completed Certificate , Diploma courses and Masters in performing arts (CARNATIC VOCAL)
- Won prizes in singing competitions at inter-school and won third prize at GPREC annual day competition
- I have been one of singing coordinators for ELECTRICUS-13 FEST in GPREC

My advise to everyone that one should need to be focused and have an update in which stream you are interested. There are many interesting subjects in EEE so my suggestion is that understand them & realize them very soon to get ultimate success in the future.

Jamalapuram Vydehi

This is Vydehi, studied Electrical Engineering passed out in 2020, worked in Deloitte as analyst till August, Currently preparing for higher studies. My CGPA was 7.95. My hobbies are Dancing, Reading, Singing, Calligraphy. My Achievements in school life is elected as head girl and receive applauds for poems written on various subjects.

My suggestion to my junior is to made good use of platforms like Conduira, HackerEarth, HackerRank etc., practice lots of questions based on aptitude and believe in yourself and the rest will follow.

Ramya Vemuri
Batch : 2010-14
Company : TCS.
Designation : Senior Developer
Dept: Information Technology

Every success story needs hard work, determination and consistency. But, most importantly it needs a place to inspire and people to encourage. Those are exactly what I've found at GNITS. When I look back in life, I can see myself in the shoes of a timid girl who hides herself in the crowd, who hopes not be seen or chosen. The transformation of making that girl stand apart and ahead of everyone else has been a process filled with lots of patience, conviction and love. I cannot imagine this happening so gracefully anywhere else, but GNITS.

With technology changing its head every other day and the competition to make yourself visible growing by the hour, sustaining in IT industry has not been a cake walk so far. But nothing ever felt impossible, neither did the thought of giving up ever cross my mind. The courage to challenge myself and my fears at GNITS has taught me to face any situation that's thrown at me in my career.

Along with many other things that this place has blessed me with, I was also given an opportunity to step into Deloitte as a fresher, where I saw myself shape into a thorough IT professional outgrowing the expectations on me. Seeing other peers from GNITS on the floors of Deloitte, equally marking their presence and achieving many milestones boosted my confidence tenfold. After a remarkable journey of mutual growth at Deloitte, I've decided to find some change and challenge after 6 years. TCS welcomed me with open arms, entrusting me with larger responsibilities. I currently hold the position of a senior developer in a technology I love, Adobe Experience Manager (AEM). I've trained many freshers in AEM and continue to contribute in recruiting fresh talent into my organization. Received many accolades from the clients I've worked for as well the organization I represented throughout my career, making my place indispensable in every team I was/am a part of.

The contribution of GNITS in helping me reach where I'm today goes without saying. I am forever indebted to all the lecturers who've believed in me and to GNITS as a whole, for playing an irreplaceable part in my journey to success. GNITS has been my wings to fly and no matter the heights I soar, I will always stay grounded to this very place, which I call my second home.

S Cherishma
Batch : 2014-18
Company : JP Morgan
Designation :
Associate Software Engineer
Dept: Information Technology

Right from school, I have been a student who actively participated in co-curricular , extra-curricular activities and balanced my education as well.

I have always been inquisitive and had that curious spec to learn anything new.

I have had an innate fear to take up something new, eventually I took it as a challenge and tried to overcome it by taking up any opportunity that came my way.

My quest for computers and programming has driven me to take up Information Technology in GNITS. GNITS has provided me with the opportunities to hone my technical skills and expand my horizon.

Being a part of several clubs like Literary Club, ISTE expanded my network and I have organized several events.

The zeal to learn and achieve more led me to be the editor of G-Gazette student edition newsletter, led me organize inter-college literary and national level Tech fest IGNIUM

In the process, I have learned organizing, technical and professional skills. I have been awarded the 'Young Engineer Award' for the IT Department for 2014-2018 batch of students.

I have procured a placement in JPMorgan Chase by being a part of the Code for Good hackathon.

At the workplace, I was initially overwhelmed as everything seemed new. Gradually things fell into place and I enjoyed working. Every task was a learning opportunity which kindled me to work more such assignments. I have also been in the organizing team to conduct the Code for Good hackathon for student participants partnering with the NGOs. It has been a quite enriching journey so far and I'd always be grateful for everyone who was a part of it , thus enabling me to grow better.

Swetha Sukhavasi

Batch : 2006 - 10

Company : Accenture Services Pvt. Ltd

Designation : Associate Deliver Manager

Dept: Information Technology

To begin with, would like to thank for this opportunity to put up few words to express the gratitude that I have for the organization.

Success for me is something to define in our own terms. A believer in extreme hard work and still entering my college life, thinking I would probably not be achieving anything except for education, this place has given me much more than that.

From a girl, who was shy, introvert and afraid to speak in the crowd to now managing a team of 30+ group and playing multiple roles in my work organization, I term it as a startling journey to where I have reached, and the first steppingstone was at this very place. I had the environment to express and ask for help with the faculty, getting the extra attention to only help me better myself, made me a better person strong enough to fight the odds as I passed out of the college.

Work-life hasn't been easy, however it's the willingness to learn and achieve new goals that got embedded in this 4year period, never allowed me to give up. Started career as a pure functional testing resource to now being an Associate Deliver Manager at Accenture, for me it's beyond the technical achievements but a stronger & wiser person to have come this far.

Few Achievements to share:

- Associate Deliver Manager and a certified Scrum Master
- Leading a 30+ CMS team specialized in Adobe Experience Manager functional
- Part of the Accenture New Hire and Recruitment team
- Leading People Well Being Forum for the Market unit and Delivery group in the organization

To conclude – “I didn't get there by wishing or hoping for it, but by working for it” – Estee Lauder.

Thanks to all the faculty, college staff and my dear friends that I have made here and are still with me in the journey of life.

Phanisri Challa

Batch : 2006-10

Company : Deloitte Consulting India Pvt. Ltd.

Designation : Manager

Dept: Information Technology

Living in a small town in a joint family has taught me the first lessons of my life - to share, to make memories, to care about people surrounding you, to enjoy every moment, importance of apologizing, being honest and most important of all "a very little is needed to make a happy life".

My surroundings were way too different from my peers, I didn't have kids in my neighborhood, nor did I have a park to play, we were located amidst the nature with farmlands, green hills, a lake view, and forest that was within a mile's vicinity with sparsely populated houses and few little people to interact with.

When you are closest to the nature, you see the real beautiful world. The heavenly fragrance of the first rain, the picturesque view of the mountains when raining heavily, the biggest canvas with innumerable stars during the summer nights on the terrace. It was a hard decision to leave the world behind to pursue opportunities in a new city. Here I was with 40 odd families in the apartment with uncountable friends. It was overwhelming for me to grasp and get accustomed to the new surroundings. I was criticized for my speaking skills, lifestyle, and fashion sense. It was hard, very hard for a small little girl from a small town to overcome this, but I knew all I needed was a little belief in myself. I cried my heart out and my parents just told me one thing, "play your strengths" and I never looked back. I topped my class and was recognized as a good student, I helped everyone in every possible manner, was honest with my friends, participated in all elocution competitions and just those little things made a difference, brought in happiness. I was one of the toppers, won multiple awards, scholarships, certificates.

Well before I realized, was into high school with scholarship, thought I was the best in studies. Little did I know that I was probably one of the million pebbles in the sea. Stress, pressure, and assignments were the only things I experienced 24x7 and I no longer experienced success, was struggling to do better. Lost focus, lost concentration and did ok in the year but could have done better. Something I learnt in those years were, success doesn't come with knowledge or intelligence, comes with hard work and zeal to learn. I promised myself to do better next. My next destination was Women's Engineering college, always thought that Co education offered more confidence, competition, and opportunities but I was proved wrong. GNITS was the place where I got opportunities to organize events, lead teams, was exposed to complex situations and was provided a chance to explore all possibilities which instilled confidence to adapt to any situation. My parents had to forego a lot in their career to help us achieve our dreams and I

have decided to give my best in my college to reciprocate my love, respect and thanks to them. Their joy didn't have any bounds when I had offered my gold medal to them as a token of respect. We celebrated, laughed, cried when I made it in campus selections.

Change is the only constant is what I have learnt in my 12 years long stint with the same firm ironically. Always looked out for new opportunities at work, gave my best every single day, tried making myself a better professional, won many accolades, awards every year. It was absolute best when my parents were invited to give away an award and share my happiness in front of my colleagues. Something I learnt in my entire journey was, there is always a better performing person around you, and you are not the best but what makes you different is the attitude you carry, the genuine personality you bring, the warmth you spread to the people around you, the happiness, smiles you bring in someone's life. Every stage of my life has taught me a precious lesson that will bring in bliss in my life and made me a better person. The journey and the learning continue....

Sai Chandana Gudimetla

Batch : 2011-15

Company : CHEP USA.

Designation : Applications Developer

Dept: Information Technology

I would like to congratulate the faculty, management, alumni and students for the successful 25 years in the history of GNITS. I'm extremely proud of this organization, that has been a driving factor in making me what I'm today.

I'm thankful to the college and faculty who have helped me in my journey from being a stage-shy student to a successful professional. I have always wanted to be a software engineer. GNITS has provided me with a platform to learn and experiment.

I have thoroughly enjoyed 4 years of my college life. Every day was a learning curve. It has imbibed in me, the knowledge and skills, that has helped me land my first ever job at Deloitte.

After working as a Business Technology Associate at Deloitte for 3 years, I have decided to pursue masters at University of Central Florida. I'm currently working as an Applications Developer at CHEP USA. Constantly challenging my skills has helped me to never give up and stay up to date with the latest technologies.

I would conclude by saying that "Don't just dream or aim high. Work continuously towards achieving your goal. Dedication and hard work are the main factors that help you reach great heights".

Prasanthi PVL
Batch : 2015-19
Company : Service now
Designation : Software Engineer
Dept: Information Technology

Life is compared to be the most unpredictable and yet the enjoyable sport and so was mine. Going back down the lane looking at myself, I was a student excited always about the co-curricular activities along with academics. I grew up to be more inquisitive person, with a zeal to understand and solve the problems around to the extent I could. Though this was my mindset, was never inclined to pursue my career with Information technology – considering my understanding being IT a boring non adventurous job not aligning with my ideology. Soon after completing my +2, I decided to join GNITS taking up IT stream on my family's advice. As I started to progress further with the course in the college, I began to realize how magnificent the technology is and what could one do with the aid of same. I began to explore more as I learnt more tech stack, participating in hackathons and attending tech talks, workshops. Along my professional grooming, GNITS also opened room for me to explore unlock my personal barriers. I got a chance to groom my leadership skills and bring out the joy of working with teams as part of various clubs and initiatives.

Starting a noob to code, I grew up to enjoy competitive coding step by step. The mantra to continuous development, I realized is "Teach what you know and learn what you can". We organized mock interviews and group discussions amongst us classmates to prep ourselves to face the tech giants visited for campus placements. I was one among the few got select for "Deloitte – Tax ", the second company visited the campus. I continued to still not stop and attended more of the placement drives, with each encounter boosting my confidence. I went on to further have gotten selected for an internship at Servicenow, and then an FTE opportunity with HSBC.

I enjoyed accompanying my classmates and friends for their placement drives – boosting their confidence and cheering them up gave me utmost joy and bliss. Sooner I started my internship with Servicenow, during the same tenure I was selected the student president of college and was also announced the "Best Outgoing Student" of the batch.

As one final opportunity I attended the EA games hiring drive and went ahead to receive a FTE opportunity with highest package in my batch. Later I got a PPO from Servicenow towards the end of my internship and chose the same to start my career with. I strongly believe till date any achievements or the career opportunities I could grab was because of the amazing aid and support of the management and friends along with the continued learning spirit.

**Ranjitha Modali**

Batch : 2006-10

Company : Deloitte

Designation : Manager, Global
Marketing & Communications

Dept: Information Technology

My time at GNITS was truly memorable—it was a perfect balance of fun and education and I was fortunate to be surrounded by good people. I will always be grateful to GNITS college and lecturers for the learnings, experience, and exposure I've had. Before joining GNITS and even in the initial years, I was very timid and reclusive, and I used to struggle with an inferiority complex. But GNITS gave me the platform to overcome that trait and connected me to my friends for life. A combination of this has had a very positive influence on me and helped shape my confidence and transform me into an optimistic person. Even after graduating, I've always loved coming back to the college for the alumni meets and the mock interviews conducted for the recent batches.

During my final year of Engineering, I was contemplating multiple career path options—whether to pursue MS or MBA or gain some work experience at first and then pursue higher education. Moreover, I was also pondering whether to continue in the IT field or to make a switch. That is when I learnt of an opportunity with GSS InfoTech in marketing and applied for it. I was fortunate to clear the interview even though I didn't have an MBA degree. Back then, I wasn't sure if this was the right decision for me but decided to take the plunge with good faith and courage. Today, I feel it was one of the best decisions I've taken professionally. I chose a path that compliments my personality—I love creativity and strategy and both these are key in the work I do.

After learning the ropes of marketing and branding from my first stint, I interviewed with Deloitte in 2012 and got in as a Marketing Analyst. In my 10 years with Deloitte, I've gained experience across various facets of B2B marketing including digital marketing, competitive research, account marketing & management, organic and paid social media promotions, SEO, campaign development and execution, portfolio marketing, partner marketing campaigns, content development & management, branding, online & in-person event management, reporting, and new-age marketing tools.

My professional journey has helped shape my personality as well. Some key strengths that have helped me over the years are **resilience**, **grit**, and the **constant urge to learn**. Resilience and grit have helped me better handle stressful times, maintain a positive approach, and stay focused on my end goal. The constant desire to learn something new has helped enhance my

knowledge, and it is something I will continue doing. Throughout my career journey, I've had multiple learning opportunities and accomplishments. A couple to mention:

- Played an instrumental role in rebranding GSS America to GSS InfoTech, right from conceptualizing the current company branding & logo, internal/external branding and communication, and managing all the marketing advertisements.
- I was fortunate to get nominated for Executive Programme in General Management, a 1-year course with IIM Calcutta. This was through Deloitte and an opportunity extended to top performers.
- Having played a key role in establishing my current global team in Hyderabad and formulating processes, right from scratch—I'm recognized as a critical resource and asset to my current team and have a seat at the table. A recent compliment I received was that "I'm a multi-hyphenate of my team."

Privileged to work in a global ecosystem and learn from colleagues across the world.

Amulya
Batch : 2015-19
Company : Salesforce
Designation : Systems Specialist
Dept: Information Technology

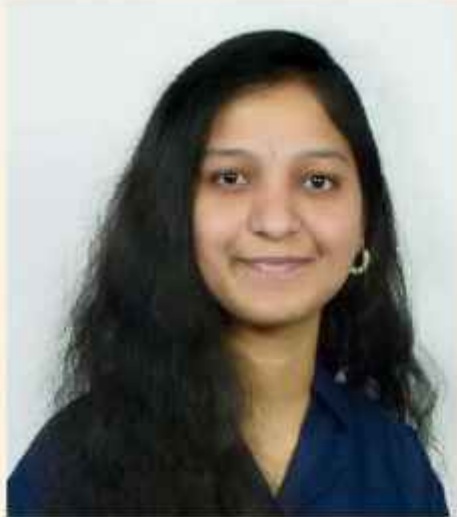

GNITS is one of the best decisions I've made in my life! It shaped me into who I am and inspired me to become an independent, confident, and dynamic woman.

The college has given me great friends & lecturers, cheerful memories, and morals that will be remembered throughout my life journey.

During my third year of college, I got an opportunity to be part of a Salesforce summer internship. After an enriching journey and final evaluation, I received a Pre-placement offer as an Associate Systems Specialist. Currently, I'm having 3+ years of working experience at Salesforce and marked milestones such as promotion, global recognition, and ample opportunities in my career progression.

I'm grateful to my college for providing a wonderful platform for many students like me to achieve their dreams.

Yamini Podugu
Batch : 2017-21
Company : , S&P Global
Designation : Associate Software Engineer
Dept: Information Technology

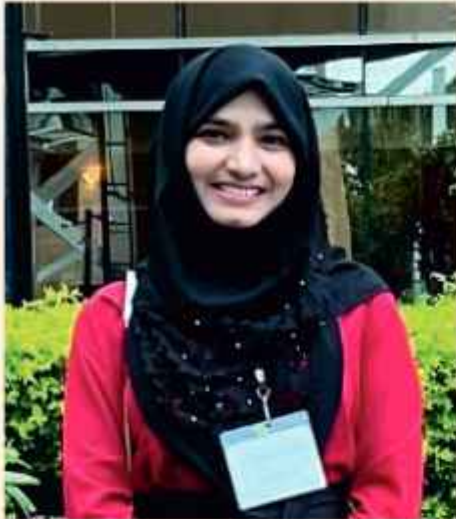

My journey began as an innocent girl full of dreams and hopes for my future. Initially, just as most of you, I used to struggle hard to manage academics. But then, some gradual shift took place in me. From then on, I always strive hard to make myself aware of many things and I focused on learning. It's like I never looked back and continuously improved myself. I think one of the qualities which makes me unique is my curiosity. The way I see and analyse makes me feel things are extremely fascinating. I'm evolving, I'm still learning, understanding and reading things. And I feel this evolution happens in every phase of life and we keep on changing, and our perspectives keep on changing, our interpretations keep changing. But I've put my heart in my studies and things I do, that's the reason I'm here. I know from the stage where I came from and where I am now that it is amazing to see all this myself. And I'm loving the way I've grown up as a woman.

Being studious all the time and focused made me see things differently. Since I joined this college I've learnt a lot as a person during these four years. Life has taught me the ups and downs. The thing I realised after all this is you should focus on yourself more than anything in life. These four years happened so quickly I've seen many unforeseen changes in the world and myself as well. But I came through all of this because of the constant effort I put in no matter what. However, I'm grateful for all the faculty's valuable guidance and I've always loved my teachers. I know that in this day and age, we hardly appreciate their efforts and I just wanted to say "Thankyou".

Ever since I entered into the corporate world, things have been exciting and brought different perspectives about things in me. And I feel like I'm the way I truly am. I've been in your shoes and I know the future seems scary with unpredicted responsibilities and challenges.

However, trust me as time moves on, the path becomes clearer and you will turn back and wonder how this ever happened. Have faith in your own abilities and strengths, polish them consistently and I'm sure that you will turn out to be valuable assets to our nation.

Hope our paths cross in the future and I get to hear more about your amazing journey. Looking forward to that day .

Sadaf Naaz
 Batch : 2017-21
 Company : Deloitte Consulting India Pvt. Ltd.
 Designation : Analyst
 Dept: Information Technology

I am **Sadaf Naaz**, born & brought up in Adilabad, Telangana. Most people know me as a chirpy, bubbly girl who radiates positivity & good vibes. My teachers know me as a sincere & disciplined student. I'm an extrovert in nature & fond of making friends. I enjoy public speaking ever since my childhood.

However, with self-motivation, perseverance & some great teachers who identified my potential, I was able to regain "my place" i.e., 'first' in everything I did. I was able to overcome my stage fear.

I was shattered but I continued to be resilient & optimistic. I always believe **There's light at the end of a darkness-filled tunnel** and the **light** to my dark tunnel was **GNITS!** I got into this college through a BC-E reservation. I perceived GNITS as a platform to find my true potential.

When I joined GNITS in 2017, I had a fragile kind of personality and was not ready to face life's challenges. I came out of GNITS as a stronger & better person. I've learned that '**acceptance**' is the key to peace. No matter what happens, the first thing we must do is to accept it & only then can we get past it. There was a time in my 3rd year of B-tech when I was on the verge of losing my self-confidence. Thankfully, **Hod of IT, Ravi Prakash Sir** provided an opportunity & encouraged me to attend "**CII IWN Telangana Annual Leadership Conclave-2019**" where I heard many empowered women speak about their journeys. This instilled a rejuvenated form of self-confidence in me and I was all set to embrace the journey of finding my purpose in life.

I feel blessed to be an **alumna of GNITS** which provided us with excellent placement opportunities even during Covid. However, it was difficult for me to prepare for the placements as I was stuck in my hometown during Lockdown with Poor network connectivity. I felt distressed but decided to give my best. Whenever there's a bad situation, I imagine the worse possible scenario and prepare my mind for it. I decided to prepare myself mentally even for the day when I will not get placed so that it would be easier for me to accept it.

I graduated in July 2021 and unfortunately fell sick due to Viral arthritis which left me bed ridden for weeks and the side effects lasted for over 5 months. I joined Deloitte on Sept 27, 2021. I used to experience pain in every single joint of my body and I was nervous about my new phase of

life. I had second thoughts about opening up regarding my health situation to my team lead. I waited until I had no choice but to communicate. I am extremely happy to say that my team lead empathized with my situation and my project team always provided me with the required support and flexibility. I recovered from my illness and gave my best in everything I did here. I certainly succeeded in making my own identity in a team of 50. A "perfect match" is my project team to me. I feel like I was meant to be around these people. I have not stopped learning ever since I joined my project. I was awarded a **reward for excellence** within just 6 months of joining this project. I am looking forward to exploring the greater heights of success.

A final piece of advice for the juniors:

I know that we never want to disappoint our parents & teachers but there's 1 more person whom you should never disappoint and that's your younger self! Whenever you feel down, just remember your younger self who left no stone unturned to give you the life you deserve. Communication is the key. Please try to communicate about your mental health as and when possible. Optimism, Resilience & Acceptance are the key takeaways from my life experiences. Never be afraid to dream big and do not settle for anything less because Sky is the limit for you! If you are interested in 10 things then go for all of them and choose that. Listen to your heart. Do not work until it's done but until you're satisfied; that way you give your 100% and have no regrets. No matter how messed up things are right now, it will get better. Let us not just 'survive' through this world but also 'live' every moment to its fullest.

Divya Pentyala

Batch : 2014-18

Company : Deloitte consulting India Pvt Ltd

Designation : Consultant

Dept: Information Technology

I was a very shy and introverted person, but GNITS helped me build my confidence. I was blessed to have the best faculty who taught me programming languages and helped gain practical knowledge in addition to theoretical knowledge. The knowledge I gained in GNITS helped me get placed in one of the Big 4 companies- Deloitte and it's useful till today. I had been part of ISTE (Indian Society for Technical Education) and organized several technical events during the 4 years of engineering. I could continue the same in my professional career and organized/hosted events at the service line level which helped me get visibility and appreciation at the leadership level.

I learned to be a good team player and a good leader being a part of GNITS handball team. I could use my strong technical skill and excel in my profession by optimizing few processes. I also received applause and spot awards for the same and have also been promoted in recognition of my caliber and performance with just 2 years of overall experience and was the youngest in my team to receive a promotion that early in my career.

GNITS has played a crucial role in shaping my career. I feel that wherever I stand today and whatever success I achieve in future is because of the learnings that I had in GNITS.

**Namratha Sai Gopisetti**

Batch : 2001-05

Company : JP Morgan Chase

Designation : Vice President

Dept: ETE

Graduation from G Narayanamma Institute of Technology and Science, was one of the best decisions I took on the journey that I had traversed during my educational years. The lush green campus has taught me the skills of being a Leader, a Professional and to top it all has been an apt enabler which helped me grow in my career. It also helped me with my father's Enterprise "Trident Farm Implements Private Limited" as I was very easily able to apply the skills that I had garnered in GNITS in the organisations I have worked with.

Today I proudly call myself a self-directed and self-driven Senior IT Engineering Leader with over 17 years of Industry Experience and comprehensive accomplishments in building, organising, structuring, optimising, and managing teams to ensure high quality products. I am a creative and innovative leader with strong industry acumen, having demonstrated success in designing software products for global organisations in the Healthcare and Banking domains.

I currently lead and manage the entire Home Lending - Servicing - Non-Performing Loans Area Product portfolio in India and am also responsible for all the Area Product's delivery. Product Technology Strategy, Design & Development, Agile Adoption & Implementation, Risk Management, Cloud, Data Centre Migration, Modernization of Legacy Applications to New Banking aligned technologies leading teams aligned to legacy, modern, workflow and data technologies, have been regularly rewarded and recognized for the accomplished tasks.

I am recognised for curating appropriate operational, implementation strategies and methods through detailed analysis and understanding of the Product, Business and aligned Technology stack.

At JP Morgan Chase, I have also been responsible for delivering very high critical organisation initiatives going above and beyond the regular delivery and helping the Organization meet the set targets. This has only been possible due to opportunities and avenues I was provided with at GNITS which include:

- Product Operating Model.
- Diversity & Inclusion.
- Self-Drive Initiative - Increase Decision Making Product Roles in India.
- Gainfully Occupied - Upskill Senior Leadership with one new Trending Technology.
- CCB - OKR and Initiative Strategy and Content Creation Manager,
- Total Cost of Optimization (TCO).

C Narmada
Batch : 2002-06
Designation: Addl.SP Nalgonda
Dept:ETE

I am C.Narmada presently working as additional DCP of Rachakonda Commissionarate. I was born in Vijayawada and did my schooling from Bhavans Hyderabad. My mother is a bank employee and father is a Lawyer. Since my childhood, my father always took me with him to court and other Govt institutions where I got acquainted with the way in which several administrative authorities work hard to run the society efficiently, thereby helping the people. It was those tours that motivated me to take up and attempt competitive exams like UPSC and group-1. After several unsuccessful attempts, I succeeded in securing the 71st rank out of a total of 1 lakh odd candidates in group-1 exam and got allotted as deputy superintendent of police. The training period was very tough and I had to endure several hardships. I had to stay away from my family for almost a year during the training period which was very emotionally draining. As a police officer, I have to learn something new every day and fight my way through a variety of difficulties, most of which are unprecedented. I love my job and I thank my parents and my husband for supporting me through all this.

Shruti Ahuja
Batch: 2004-08
Company: Ahuja Engineering Services Pvt Ltd.
Designation: Director and Business Head
Dept:ETE

Graduating from G.Narayanamma institute of Technology and Science, ETE in 2008 followed by Masters from SUNY Buffalo in 2010 paved my first and most important steps of my professional journey.

After returning to India in 2010, I was motivated to start my entrepreneurial journey by my Father - my guide, inspiration and mentor. He started his own company in 1988 and left no stone unturned in helping me start my journey. I joined his company and worked on many ideas for a year, before narrowing down to waste-to-energy projects. We were able to identify a broad

problem statement in the field of waste management and slowly identified technology and engineering solutions that we, as a company, could cater to. Our range of products and solutions are 100% indigenous (**Proudly Made In India**).

Fighting through many ups and downs throughout the journey which now exceeds the time period of a decade, we have established ourselves as a reputed brand name in the field of biogas/waste-to-energy, executing turnkey projects. We are glad that we could play to the best of our strengths and build products and services that can deliver business solutions to issues persisting around proper handling and disposal of wet organic waste. I consider myself lucky because I could experience the concept of building a business vertical from scratch and also could learn many aspects of running a business including technology development, manufacturing, business development, marketing, sales, finance and customer interfacing. We are proud of our contribution towards the Swachh Bharat Mission, providing solutions that not only make India Swachh but also help in making our environment cleaner and greener.

- **Special achievements**

- Started a new vertical of business in the field of waste-to-energy.
- One of our projects was spoken about by PM Modi in Mann Ki Baat.
- We received research scale-up and technology commercialization funding from Indo-US Science and Technology Forum and Department of Biotechnology.
- We were awarded FTAPCCT's award for excellence in renewable energy.
- TEDx speaker.
- Seven research publications with CSIR-Indian Institute of Chemical Technology

Sumana Suresh
Batch: 2008-12
Company name: Brex
Designation: Senior Security Engineer.
Dept: ETE

After graduating from GNITS, I worked as a Software Engineer for two years. This experience really helped me in building my resume and profile for Master's applications. Thanks to the guidance and support I received from my professors and the Head of Department of ETE, I was able to get an admission at Carnegie Mellon University to pursue my Master's in Information Security. During my Master's at Carnegie Mellon, I got the opportunity to explore the field of Information Security and work on complex projects. I was able to present papers at security conferences. I'm currently working as a Security Engineer helping developers build secure products.

Navya N

Batch : 2008-12

**Company : Deloitte (Past),
Present Proprietor of the leading
Jewellery store in Sangareddy.**

Designation : Former Senior Analyst (Deloitte)

I am an alumnus of GNITS from the ETM branch, decent at academics and also actively participated in extracurricular activities. I was the captain of the first handball team of GNITS. Our team had won central zones under my captaincy. On the academic front, I, along with my wonderful teammates, won the first prize in successive years in a project presentation competition. I greatly appreciate the efforts of my amazing friends and faculty continuously guided and motivated me right from the first year.

After B.Tech, I was one among the very few who got selected for Deloitte. I was very excited for the job but I knew I had a passion for pursuing an MBA. With this zeal, I pursued my executive MBA from IIM Kolkata. I worked with Deloitte for almost a decade. It was a decade filled to the brim with various challenges. It was a great journey; both personally and professionally.

I am currently working as the proprietor of a leading jewellery store in the Sangareddy district. Everybody wondered about the reasons for such a drastic transition. I personally wasn't very confident taking such a big step. Many questions haunted me. I wondered if it was worth changing my entire profession after having studied a field for so many years. Most of all, I feared judgement from people.

My mom is the wonder woman who has provided me with answers to all these questions. Her words built confidence in me. She reminded me that I gained knowledge and the knowledge once gained will never go in vain. I learnt teamwork, communication and many more throughout my journey. She encouraged me to put them to use in another field.

Even after my mom's comforting and motivating words, I feared failure. My wonderful mom again came to my rescue. She reminded me that failure is not the end of the world and also that I have an excellent academic background as a backup.

"Life is unpredictable. Grab the opportunity awaiting you before you lose it."

Ala Venkata Himashaila

Batch : 2011-15

Company Name : Ernst & Young LLP
(GDS – Global Delivery Services)

Designation : Senior Consultant
Dept:ET

After graduating from the dept. of ETE from GNITS, I was placed in Accenture as a Software Developer through campus placement. I worked for an Insurance client to develop software related to performance of their distribution agencies and this was the first glimpse into the vast world of Finance. I was deeply interested and motivated to learn more about Stock Markets, Mutual Funds (MF) etc. I pursued an MBA in Finance from SIBM Hyderabad and was placed with Invesco where I worked on debt-based mutual funds and was a part of the regulatory coding team implementing critical libraries on the mutual funds in Asia-Pacific and European regions, to prevent financial losses and regulatory frauds during trading.

With the diverse and holistic knowledge gained from this experience, I took another step forward in my professional journey by joining E & Y as a Senior Consultant, where I work with best finance companies from Fortune 500 clientele. I enable them to realise maximum profits and avoid regulatory risk on their Mutual Funds.

Special Achievements:

- Currently working with Lloyds Banking Group, one of the largest banking groups in the world, as a solution consultant to provide innovative solutions for the analytics and trading divisions of their Mutual Fund platform.
- Worked with Invesco India Private Limited as a Compliance Analyst and successfully implemented the regulatory libraries for Mutual Funds in Asia-Pacific and European regions. This ensured prevention of financial losses and regulatory frauds during trading.

Madhura Bhat

Batch : 2014-18 Company : Intel
Designation : Former Component
Design Engineer Grade 5
Dept:ETE

I am an alumni of GNITS. I pursued my B.Tech in ETM. I did my M.tech from Manipal Institute Of Technology. I joined Intel as an Intern in 2020 and was employed after a year. I was a Component Design Engineer of Grade 5. I worked for Intel Programmable Solutions group. I am familiar with Verilog, system Verilog languages and was a part of the Ethernet Design Team. Currently after 2 years in intel, I am planning for Masters for Fall 2023 in ECE domain.

"Give your best in everything you start."

Aishwarya
Batch:2012-16
Company name: Gartner
Designation: Project Manager. Dept: ETE

Equipped with an Engineering degree from GNITS, I went ahead to work with my father in our family Telecom business. After working there for over a year, I realised that my interest lies in management and decided to hone my management skills with an MBA. After graduating from MBA, I joined TCS and worked as a Business Analyst and also as shadow Project manager. During this time, I interacted with diverse cross functional teams spread across various geographies, captured their requirements from clients and translated it to user stories to ensure clear understanding by the scrum team.

I have efficiently managed teams spread across various geographical areas leading to improvement in delivery time by 20%. Recognizing my efforts, TCS-Honeywell has honoured me with a position in the Hall of Fame in their newsletter and bestowed several awards upon me. Three months into the project, I finally found my call while performing Project Manager Duties and decided to dig deep into the Agile/Scrum world. With extreme hard work and job experience, I got certified from Scrum.org. This boosted my confidence and I moved to a full-fledged management role. I am now working as a Project Manager in Gartner. I love my work. My advice to peers would be to find your passion and not go by the conventional norms. Understand and explore your skills to find the career path you like and achieve success.

"Do what you love, Love what you do."

Seema Samreen
Designation: Cyber Security Analyst.
Batch: 2014-18
Company Name: Par Pacific Holdings, Inc.
Dept:ET

I would have considered myself as an average student though that would also be a stretch given the standards at GNITS but my lectures never gave up on me and had always encouraged me to do better.

Their encouragement had worked wonders and boosted my confidence even after I left GNITS. I started pursuing my dream of working in the cyber security field by taking up Certified Ethical Hacker course and have also completed the E-learn Junior Penetration Tester certification exam which helped me land a job as a Cyber Security Analyst in the US. If I were to pass over a piece of wisdom to my fellow college mates, it would be to never ever give up.

"Don't Limit your Challenges. Challenge your Limits"

Tejaswi Yallaulla
 Batch: 2012-16
 Company: CVENTIN (Top 8th SaaS Company)
 Designation: Principal Engineer
 Dept: ETE

I graduated from one of the renowned and best colleges of engineering G. Narayanamma Institute of Technology and Science with Electronics and Telematics degree in the year 2016. I pursued a Master's degree from University of Houston Clear Lake. It gave me many new experiences and exposed me to a variety of things that I was not formerly familiar with. Those new experiences moulded me into the person I am today.

College life is the golden period of every student's life. It makes one more potent, profound and independent. Similarly, the journey of my professional life, starting from a Junior Developer to being a Senior Developer and ex. vice president in Bank Of America to being a Principal Software Engineer in CVENT has given me a tremendous amount of confidence and helped me address new challenges and struggles in my day to day profession.

My focus lies on reducing cost and latency to make the Event Applications work faster in all the regions of the world for booking and arranging the events for customers on time. So, I still code but mentoring and guiding the engineering team in Cvent is equally important to me. That also most importantly means that I am not doing things alone. I define the technical vision so that the long-term strategy of how these systems should work and help the team work backwards from that to figure out how incrementally to get there.

I would like to conclude by stating "College Life is a remarkable and essential time in a person's life, and everyone should enjoy it. College Life teaches us many things and gives us confidence to face the challenges and struggles in our future. Instead of just focusing on academics, a person must participate in other activities and socialise as much as possible in his/her college life. All these things help in the all-round development of a person professionally and personally".

I would like to congratulate G. Narayanamma Institute of Technology and Science for marking its 25th year of excellence.

Special Achievements:

- Student Brand Ambassador for the University of Houston Clear-Lake since 2018 till date.
- One of the Inventors for a few Patents granted applications like Smart Data usage for automated response systems, detecting and responding to a security risk associated with non-electronic transactions in financial institutions.
- Vice President of Education for my Cventer C

**Sanjana Mantri**

Batch: 2015-2019

Company Name: Qualcomm

Designation: Programmer Analyst

Dept:ETE

I joined the ETM department in GNITS through spot admissions. When I was introduced to C Programming in the first year of B.Tech, I was fascinated by how much one could do with some lines of code! Every week I awaited the C Lab to learn more and more. That was when I found my passion for Computer Science, and I decided to dig deeper and learn as much as I could. I had many friends in the CSE and IT departments and often would find myself involved in

stimulating conversations about technology with them. GNITS has taught me the most important quality which a lot of people appreciate in me and that is INDIVIDUALITY. It's the place where I found myself, my passion, and the strength I needed to achieve my goals. I continued learning Computer Science subjects through various NPTEL online courses along with the ETM core subjects and I received the ELITE Certificate of Completion for two courses. Though I admire a lot of people, I look up to my father and hope to become a humble and amazing like him.

My learning journey didn't stop with college; I continued to take up long distance education in Machine Learning and Cloud with IIT Madras and will soon be completing my M.Sc. in the same field. Currently I am working as a data analyst for the Supply Chain Management team at Qualcomm. My work involves utilising the massive amount of data generated to build statistical models useful for supply chain and logistics planning at Qualcomm.

Something that I learned from my journey and that I would like to pass on is, "When certain decisions don't work out in life, it's okay. It's all part of the learning process and it's how you grow as a person. There are always going to be other ways to achieve your goals, you just have to be brave enough to go after them. Even when people make you dubious about your decisions, follow your heart. Keep the doors of your mind open to all kinds of opportunities and stay happy and healthy!"

"When going gets tough, the tough get going."
