CSE WALL MAGAZINE COMMITTEE(2022-2023)

- Chair Person** : Dr M.Seetha
Professor and
Head,CSE
- Chief Incharge** : Dr. A.Sharada,
Professor
- Staff Coordinator** : Mrs.G.Roja
Asst.Professor
Ms C.Bhagyashree
Asst.Professor

Student Coordinators:

- 4th year CSE A : G.Varshini, P.Kavya
4th year CSE B : Chetna Reddy, Ayesha
4th year CSE C : K.Sowmya,Ch.Sanjana Raj
3rd year CSM : M.Likitha, I.Shivani
3rd year CSE A : Harshini, Vamshi Priya
3rd year CSE B : R.Bindu, M.Aishwarya
3rd year CSE C : R.Manisha, Akshara
2nd year CSE A : A:Rithika Jalagam,V.Anoushka
2nd year CSE B : M.Sahithi,M.Sangeethika
2nd year CSM : A.Ch.S Kanakadurga,P.Sudheshna
2nd year CSD : B.Srija ,S.Pranathi

CULTURE

Vaisakhi

Baisakhi, also known as Vaisakhi is a festival that holds immense significance for the Sikh Community as it marks the birth of Khalsa Panth, the warrior Community of Sikhs. It is celebrated every year on April 13 or April 14.

The history of Vaisakhi dates back to the year 1699 when the tenth guru of Sikhs formed the Khalsa Panth. Since then, Vaisakhi has been celebrated as a day of great significance and is observed with enthusiasm and zeal by the Sikh Community worldwide.

Vaisakhi is also celebrated by Hindus in Punjab as the beginning of the new solar year and is considered an auspicious day to start new ventures and businesses.

In the state of Punjab, where the festival is most widely celebrated, farmers also celebrate Vaisakhi as a thanksgiving day for the harvest season.

In Conclusion, Vaisakhi is a festival that holds great significance for not only the Sikh Community but also for Hindus in Punjab.

It is a day of thanksgiving, celebration, and religious fervour that brings people of all faiths together to celebrate the triumph of good over evil and a birth of a new era of hope, faith and prosperity.

RAMADAN ☾

Ramadan is also spelled as Ramzan is the ninth month of Islamic calendar, observed by Muslims worldwide as a month of fasting, prayer, reflection, and community. The annual observance of Ramadan is regarded as one of the five pillars of Islam and lasts twenty-nine to thirty days, from one sighting of the crescent moon to the next.

Fasting from dawn to sunset to fard (obligatory) for all adult Muslims who are not acutely or chronically ill, travelling, elderly, breast-feeding, diabetic or menstruating. The predawn meal is referred to as suhur, and the nightly feast that breaks the fast is called iftar. Although fatwas have been issued declaring that Muslims who live in regions with a midnight sun or polar night should follow the timetable of Mecca. It is common practice to follow the timetable of the closest country in which night can be distinguished from a day.

The spiritual rewards (thawab) of fasting are believed to be multiplied during Ramadan.

Women and Their greatness

Women have been an integral part of society since the beginning of time. Their contributions have shaped the world we live in today. From nurturing families to leading nations, women have shown time and time again that they are capable of greatness.

Women have broken barriers and shattered glass ceilings in all fields, including science, politics, and business. They have shown that their intelligence and leadership skills are second to none. Women like Marie Curie, Indira Gandhi, and Oprah Winfrey are just a few examples of the incredible achievements of women.

Despite the progress made, women continue to face obstacles and challenges. They are still fighting for equal pay, representation, and recognition. But their resilience and determination are unwavering, and they continue to break down barriers and inspire change.

In conclusion, women are a force to be reckoned with. Their greatness is evident in everything they do, from leading nations to raising families. As we celebrate International Women's Day and Women's History Month, let us honor and recognize the incredible contributions of women and continue to support their efforts for a better world.

Poem :

Let us cherish the women of our days,
Whose beauty and wisdom never fades,
For in their hearts, a light will shine,
Guiding us with a great sign

SHORT STORIES

SUPERSTITION

Param was walking on the road with his friends late night. They finished their exams and were chilling out. He suddenly saw a polythene bag with eggs and green chillies in it. While everyone else were avoiding to walk over it, Param asked them , "what's wrong?" Everyone around him said, "It is believed not to cross over such stuff kept on roads as they possess negativity of the person who kept it on the road and it may attack us if we cross over it."

Param started laughing hard as he found it funny. One of his friends Adi asked him, "what's so funny dude?" Param with a change in his tone replied "Isn't it too silly and foolish of us, if we are wasting food on some superstition like that? and what would someone get if they let other people suffer, it clearly shows how bad people think.

To make sure that they feel positive and less burdened should they transfer it to other person?" Adi has felt that there was a point in Param's argument. He nodded his head in agreement.

Then Shiv started arguing as he denied with Param saying, "Are you sure? Because there are some supernatural powers which made us believe this. We can't see them yet we can't ignore them. Few beliefs are the truths. We must not be judging before giving it a thought".

Param responded, "Super natural powers , come on , you really don't care , do you? Do you know how many people suffer from long starvation because of poverty? Why people are mad and blinded by such unnecessary beliefs? We need to differentiate between beliefs and stupidity".

Shiv asked, "Oh if it is like that why don't you pass over it?" Param said with confidence, "You know what I feel like eating an egg omelet.

Are you guys with me?" Everyone else were in shock as Param took the polythene bag kept on road and took it home

Childhood memories

As our school bell rang,we would run back to our sweet homes.The ribbons which were knotted before going to school would fall apart by the last hour of the school,the shoes would become dirty as we played in the sand.Those days were so precious!As soon as I went home I used to take my shoes off and get ready.My house would be so clean and organized. The whole house would smell so fresh with the smell of incense sticks and the aroma of my mom's cooking would reach the end of our colony lane.I would run to check what was cooking.

Every evening all the kids in our colony would assemble and we all would play together till we were called by our moms saying,"It's Dinner time".Our thoughtless souls would never care what was going on in the world. It would be a disaster if we wouldn't go home by our mothers' second call!We used to wave each other a goodbye and go back home.After a sumptuous supper,We used to have conversation with family. I used to share all the little things of what has happened that day .Those bedtime stories which me and my sister never missed to listen while we were put to sleep.What a wonderful time it was!As the time passes ,we all get older and responsibilities surround us just like water surrounds an island.One thing is for sure,We need to consider every moment as the precious moment and live it.

REVOLUTIONIZING SOFTWARE DEVELOPMENT: THE POWER OF DEVOPS TECHNOLOGY

DevOps technology is an innovative approach that brings together the development and operations teams to improve the software development process. DevOps aims to reduce the time taken for software delivery, enhance the software quality, and increase the collaboration between the teams. DevOps technology has been gaining immense popularity in recent times, and many organizations are embracing this approach to improve their software development practices.

DevOps technology promotes a culture of collaboration, communication, and automation to streamline the software development process. By using DevOps tools and practices, developers and Operations teams can work together seamlessly to deploy code and manage the infrastructure efficiently. This technology ensures that

the software is delivered faster and with higher quality, as it allows for continuous integration, testing, and delivery. DevOps also ensures that the software is highly scalable and available, and it reduces the risk of downtime and outages.

DevOps technology is a game-changer in the software development industry, as it brings together the development and Operations teams to work together collaboratively and efficiently. By adopting DevOps practices and tools, organizations can significantly improve the software development process, reduce the time-to-market, and enhance the software quality. DevOps is a crucial technology that is essential for organizations that want to remain competitive in today's fast-paced software development industry.
