Disaster Management Mechanism

Introduction:

Disaster management in educational institutions is crucial to ensure the safety and well-being of students, staff, and faculty in the face of natural or man-made disasters. Implementing a robust disaster management mechanism is paramount to safeguard lives and ensure a secure learning environment. In this context, GNITS has come forward, to take an initiative to create awareness and involve the both staff and students to disaster management mechanism. Being an academic institution, here the chances of occurrence of disasters are minimal, based on that, we have few disaster management mechanisms in the college. Evacuation procedures, first aid training, and infrastructure preparedness are key components. Collaborating with local authorities and involving the community enhance coordination during crises. Post-disaster recovery strategies, including psychological support and infrastructure rehabilitation, complete the holistic approach. Here's a comprehensive overview on the initiatives taken under Disaster Management Mechanism.

- a. Fire Extinguisher
- b. Fire Hydrants
- c. First Aid Kit in all the departments
- d. Display of Emergency contact numbers
- e. Evacuation Routes / Emergency Exit
